# List of Tables

Table 1 | The five pairs of lax vowels and tense vowels in Dutch. | 10  
Table 2 | The words for the stimuli used to elicit the four target vowels /i/, /u/, /a:/, and /a/, and /s/. | 28  
Table 3 | A summary of the content of the corpus. | 31  
Table 4 | The results from four ANOVAs making the comparison between IDS and ADS and between IDS-11 and IDS-15 with respect to the F1 and F2 of the vowels /i/, /u/, /a:/, and /a/. | 33  
Table 5 | The average Fo-median and Fo-excursions in IDS to infants at 11 months, IDS to infants at 15 months, and ADS. | 36  
Table 6 | The descriptive statistics of the vowels /a/ and /a:/ in Dutch IDS and the descriptives of the pooled distribution of all /a/ and /a:/ tokens in the corpus. | 53  
Table 7 | The local maxima in the smoothed two-dimensional distribution with a density over 0.25. | 56  
Table 8 | The stimulus sequences as used in the discrimination experiment. | 62  
Table 9 | The results of the ANOVA. | 65  
Table 10 | Acoustic measurements of the 12 tokens used in the categorization experiment. | 78  
Table 11 | A summary of each of the four blocks in the categorization experiment. | 80  
Table 12 | Analysis of reaction times. | 83  
Table 13 | Analysis of pupil dilations. | 87  
Table 14 | Analysis on 15-month-olds’ reaction times and CDI-score. | 89  
Table 15 | Analysis on 15-month-olds’ pupil dilations and CDI score. | 89  
Table 16 | The descriptive statistics of the vowels /a/ and /a:/ in the corpus of Dutch IDS. | 100  
Table 17 | The MoG models’ frequency estimates of the categories /a/ and /a:/ | 108  
Table 18 | The parameters of the categories /a/ and /a:/ for F2 and duration that describe the average locations of the categories in the Mixture of Gaussians (MoG) in the auditory space. | 109  
Table 19 | The 2-cue-no-ρ MoG models’ perception quantified per quadrant. | 110
List of Tables

Table 20 The estimates of the frequency of the categories /a/ and /a:/ by the neural network model. 126
Table 21 The parameters of the 2-cue neural network models for the categories /a/ and /a:/ that describe the location of the categories in the auditory space defined by F2 and duration. 127
Table 22 The 2-cue neural network models’ perception quantified per quadrant. 129
