Thank you!

Professor van Gulik, dear Thomas, thank you for giving me all these opportunities. Thank you for letting me dream and wonder at the world. Not just the world of surgery, but other worlds I would have never seen without the possibilities you created (with & without the camera).

The members of the committee; Dirk J. Gouma, Erik Rauws, Hein Verberne, Jan Ijzermans, Charles Balabaud, Han Lameris, thank you for reading and discussing the research that was conducted in the past few years. You have been an inspiration and it is an honor that we can have a discussion on the subjects.

Nienke, thank you for your ideas, your advice, and the research project that you let me finish! I can only hope I have finished your research to the fullest.

Dr Bennink, dear Roel, thank you for your optimism and your love for (PET) images. Your door was always open for questions and you have been patient with my schedule.

Dr Verheij, dear Joanne, thank you for letting me in. To be honest... I have learned more than I thought possible on the field called pathology. Thank you for sharing the way you see the world. So different from mine, but interesting in detail (either through a microscope or the greater picture on research). Thank you for your positive criticism that has made this thesis of higher quality.

Dr. Pierik, dear Robert, thank you for sending me off to Amsterdam to lose my wings. I never did, you were right all along; I am a butterfly. Thank you for knowing even when I didn’t see it myself.

Dr. Mostert, dear Adriaan, thank you for sharing that dream. Let’s get together out there and make it a better place!

Prof Gouma, thank you for your honesty right from the start. You got me on edge to find that something that fitted.

Cees (Prof Dejong), you have a way with words that make me smile. Thank you for caring for those under your guard and your enthusiastic way of educating and coaching.

Prof. Paulette Bioulac-Sage and Prof. Charles Balabaud, thank you for sharing your knowledge on the immunohistochemical subclassification of hepatocellular adenomas. We felt very welcome and honored that we could work with you.

Irene, you sweety, thanks so much for all your love and great chats. You have the most wonderful soul!

Rowan and Floor, you have been amazing roomies. Don’t let it get too quiet in that room. Thank you for listening to my endless wonderings. Roomy, you are a wonderful grumpy old mind, thanks for keeping
me with 2 feet on the 1st floor of the lab. Megan, thank you for making being a geek the best possible
gorgeous way to go. Dr. Heger, dear Mich, you’re gonna miss some ginge love. Dear Lindy, thanks
for your help with setting up the immunostaining at the lab. We had a great trip to Bordeaux, many
nice talks out on the balcony, and with ‘our’ backpack we’ve shared many adventures. Jimme, you are
the man... I truely hope you get the best and highest impact factor with your research as you deserve
it with all the quality effort you put into it. Sebas and Ivonne, thank you for your input and help with
the research on HCC. You have been a great help with the initiation of databases, data evaluation, and
ongoing discussion on data management. Albert, ma Cherie ... You care, with M&M’s when people
are hurting, or a smile when the day is dark. Keep that up. You brought that smile back on my face.
Ruurdje, Ivo has been the reason that I got to know you a little better. Your laugh is aantekelijkj,
your insight in hepatology is undeniable. I hope we will have many more shared dinners. Mans,
you know you still have beers in our fridge; feel free to stop by. Ruud, I have never had a tenant
before, but I am sure you are ideal. Shanna, let’s go shopping again somewhere fancy, I need
some dresses. Thanks girl for many nice congreses together, super gezellig.

Krijn, Saffire, Heinz-Josef, Goos, Martien, Rob Chamaleaux, Wenink, Kasia, Esther,
Andrea, Lisette, Thony, Geert, Marsman, Wilmar, Jaap thank you for inspiration, for
talks out on the balcony, for gezelligheid, for adventures at congresses, for lessons in
surfing, for lessons in conducting research and on how you did things before I even
started thinking about scientific writing, presentation, and articles.

Marcel, thanks for being the ‘klankbord’ for dreams, crazy thoughts and creative
outbursts. Thank you for seeing what I could only dream off. On top of the
world :) 

Dad, this is one of these moments I’m missing you ...

Mam, thank you for giving me space to work (at crazy hours), thank
you for the support from the start, thank you for believing, thank you
for being my back-up. Boaz, thanks for your safety, care, strength
and backyard campfires. Rufus, thanks for hours of enjoying mu-
sic, drinks, clothes and friendship. Luc, Maarten & Esther, Kees
& Marjolein, and Hans, thanks for many interesting medical
conversations, your travels around the world and dedication to
working where help is needed... we are family :)

Lieve Ivo, heb ik je vandaag al gezegd: ...
Let’s have more dreams together.
