Functional inoperability of oral and oropharyngeal cancer

Kreeft, A.M.

Citation for published version (APA):
CONTENTS

Chapter 1  General introduction to the concept of functional inoperability of oral and oropharyngeal cancer.  9

Chapter 2  Speech and swallowing after surgical treatment of advanced oral and oropharyngeal carcinoma: a systematic review of the literature.
A.M. Kreeft, L. van der Molen, F.J.M. Hilgers, A.J.M. Balm
Eur Arch Otorhinolaryngol 2009; 266: 1687-98.  37

Chapter 3  The surgical dilemma of functional inoperability in oral and oropharyngeal cancer: current consensus on operability with regard to functional results.
A.M. Kreeft, I.B. Tan, M.W.M. van den Brekel, F.J.M. Hilgers, A.J.M. Balm
Clin Otolaryngol 2009; 34:140-6.  59

Chapter 4  A worldwide survey on expected function after surgery for oral and oropharyngeal cancer.
Shorter version published: The surgical dilemma in advanced oral and oropharyngeal cancer: how we do it.
A.M. Kreeft, I.B. Tan, C.R. Leemans, A.J.M. Balm
Clin Otolaryngol 2011; 36: 260-6.  75

Chapter 5  Preoperative imaging and surgical margins in maxillectomy patients.
Head Neck 2012; 34: 1652-6.  89

Chapter 6  Oral function after maxillectomy and reconstruction with an obturator.

Chapter 7  Cine MRI of swallowing in patients with advanced oral or oropharyngeal carcinoma: a feasibility study.
Eur Arch Otorhinolaryngol 2012; 269: 1703-11  121

Chapter 8  Development of a dynamic model of the tongue for virtual surgery.
M.J.A. van Alphen, A.M. Kreeft, F. van der Heijden, L.E. Smeele, A.J.M. Balm
