Acknowledgments

Four years have passed since I moved to Amsterdam together with Claudia, with a luggage full of dreams, wanting to be able to make a change, to win a challenge and grow both professionally and personally. Every person I have met during this period has always asked me why I chose to move from a sunny, warm, beautiful city and country to come to the rainy and cold Netherlands. Maybe it’s true the sun doesn’t always shine here, the sea isn’t so blue and for sure the food is not one of the best (maybe with some exceptions) but what people did not always understand is that having the opportunity to live and work here, meet so many different people, points of view, cultures and habits has giving me much more. These four years here have been a great experience and definitely has changed my life.

There are so many people I would like to thank, that in one way or the other has walked in my life, some have and will stay, while others have just passed by, but somehow I still remember and would like to express my gratitude to.

Jan, thank you for having me the opportunity to be part of your group and for your support. We often did not have the same point of view on many things (people reading this will most probably smile and think...well maybe always) but we were able to find a way to accept and respect our differences and work in a good and positive way. Today I must say that I couldn’t have asked for a better supervisor; you put your trust in me and allowed me to become independent and grow professionally.

Koen, Sander and Anja, I would like to thank you for the incredible support. It was always a pleasure to be able to discuss data with you. Even when no meeting had been scheduled I was always able to pass by to ask advice or your point of view. Your knowledge, ideas and opinions have been fundamental for me.

My co-promoter Rob, thank you for your enthusiasm in my work and for your professional advise and all the patient material you kindly provided for this research.

Eszter, Wouter and Simon. All three of you have been incredibly important for me during these years not only from a scientific point of view but even personally. You were able to teach me to have passion for research and energy, to stand up for my own ideas and opinions. Eszter, you were able to transmit your positivity and energy to many other people in the lab and have been for me both a mentor and an extraordinary friend. I missed you all very much when you left and don’t know how to express my gratitude for everything.

My paranimphs: Maartje and Fiamma. Maartje, you have always spoke your mind no matter what people may say or think and this is one of the characteristics I
admire the most of you. I have always considered you a very intelligent, respectful, honest and kind person. I thank you for all your support and help, for all the borrels, dinners, advice and for being always there for me. You are not only a great colleague but most of all you are a wonderful friend. Thanks. Fiamma, first of all I would like to thank you for being a great paranimph (I think you are the only person that has read my thesis as much times as I have).....Sai che per me e’ davvero difficile scrivere questi ringraziamenti, specialmente per le persone a me piu’ care. Quindi non so da dover incominciare....vorrei ringraziarti per ogni singola cosa, ma sarebbe una lista infinita. Tu sei una persona davvero speciale, la quale ammiro come grande ricercatrice, donna ed amica e mi ritengo davvero fortunata di averti incontrata e di aver avuto il piacere di condividere ogni singola cosa con te. Grazie per essere cosi’ come sei, per essere stata al mio fianco sempre!

I would like to thank all my colleagues and friends:

Esther, Bieuwke and Dorothee, thank you for all the great times, talks, discussions, dinners, parties and borrels, to have shared with me even important and special moments of your life. Thanks for your help and support during these years but most of all thank you for have taken care of me and for making me feel always at home. It was nice to have shared these moments with you. Esther, you are an extraordinary person (you should remember that!) and have always been by my side. I find it difficult to express all my gratitude towards you in a few words. You have been such a great friend, able to pull me up and never stop believing in myself, always able, in your funny and unique ways, to make me smile. Thanks for everything and never stop believing... he!

Ola, as a colleague I think you have been the most close to me, we have worked on very similar topics. We have spent a lot of time together, work space, meeting and discussions with Jan, we have talked about ideas on our projects and given advice. I think there hasn’t been one conference that we have not spent together. But we have even shared much more as friends, dinners (and recently for a change you were the one cooking), parties, borrels, long nights talking about nothing or everything, incredible trips, Naples, NY, San Diego, Kyoto, Boston, Atlanta, Glasgow...... But most of all we have been together during the important changes in life. Thanks for being there and for all these moments. I wish you all the best.

Lydia, thanks for all the incredible trips, for all the nice talks and funny moments spent together. Good luck!

Thanks to Javi and Ruben, two extremely different characters and personalities, but extremely respectful and honest. Thank you for all the talks, discussions, borrels (Ruben, I’ll forgive you for the missed shared one), laughs, help and support. You
have been such great colleagues and good friends.

Paul, of course I would like to thank you for your technical support, for the incredible amounts of ADAMTS13 purifications, but I would like to thank you together with Marleen for many other things; the candy jar, not always filled with droppies for my luck, the incredible chocolate cookies or sweet small apple pies, the funny jokes, the laughs, the notes that are stuck on my desk to remind me what sometimes I forget; but most of all for listening to me when I was angry or fed up after a meeting, to have always cheered me up and taken care of me when I was sick and stubborn. Of course I want to thank you both and all the people in my office (Ola, Robin, Menno, Fabian and Martje) to have handled me during the writing of my thesis, it must have been a big challenge.

Robin, Fabian and Eduard, I am really glad to have been able to share with you the last period of my PhD. You have brought to the lab a new positive spirit. It has been a pleasure to spend time with you. I really wish you all the best and have no doubts that you will do extremely well. A special good luck even to Annemarie and Bart and again thanks Robin to have helped me with the cover.

Kathinka and Menno, for their positivity and unique sense of humour. I will always remember the dirty muddy shoes in the endothelial, the way of making me jump just sneaking from behind; not saying good morning when cycling and standing just next to me, but then coming in the office and being talkative and smiling as always; the terrible pasta in a can (as an Italian it was a torture) and of course the 1000 bottles of ketchup that needed to be added to nearly every dish.

Carmen and Jacqueline, to have run all my terrible MHC II mass spec samples and have always find time to help me out; Mariette, Herm-Jan, Laura, Magda and of course even Erica and Ria, for their positive energy.

Thanks also to the diagnostic department, in particular Carel and Lia, for helping with patient material, frets assay and the terrible multimer gels.

Marion and Gerty, for always helping me out with many issues and paper work. Thanks even for not going too crazy with me for often forgetting the WBSO.

I would like to thank even all the former colleagues Fabian, Henriet, Ilze, Ellen, Angela, Mariska and Eveline. Eveline, you have been the first person in the lab that I met and with who I shared many great moments and that was near me during the beginning of my stay here in the Netherlands. Thank you for everything.

My dear smoking buddies, that have shared the most unpredictable moments with me. Have been there to listen to me when I was angry or joy for me when I was extremely happy. Have handled all my different swings of moods (I must say they
have been many) and have always been ready to make me smile. Thanks

I would also like to thank many other people from the different departments for all the great borrels, drinks, dances, parties and conferences, for all the fun moments we have spent together.

I would also like to thank Erik, Floris and Tomasz for always finding time to help me with the Facs and confocal; Floris and Marijke thank you even for giving me the opportunity to rent your apartment.

Thanks to the IP department to have provided me with huge amounts of elutra cells and, together with MCB, for the nice company when sharing the office downstairs.

Tim and Monique, the best neighbours and friends I could ever have. Tim you have always been there for me, helped me out in every difficult situation that I have encountered during the past years. Thank you so much.

I would like to thank my former supervisors. Francesco Ramirez, Tina Pietropaolo and Giulia Russo. Lavorare con voi e’ stato un onore. Mi avete tramesso la passione e l’entusiasmo per la ricerca che sono stati la base per poter continuare a lavorare in questo campo. Grazie di cuore per tutto ciò che mi avete insegnato professionalmente e per avermi sempre sostenuta e aiutata nelle mie scelte.

Claudia e Fabrizio, quest’avventura e’ iniziata con voi e con voi ho mille ricordi; le cene, le feste, le lunge chiacchierate di cose semplici o estremamente serie ed importanti. Siamo venuti qui insieme ed insieme ne abbiamo passate tante. Siamo sempre riusciti a sostenerci ed incoraggiarci e a guardare oltre quando le cose non sempre andavano come credevamo. Vi ringrazio per essere stati sempre presenti in questi anni, per aver reso lo stare lontani dagli affetti meno doloroso. Siamo stati come una piccola famiglia napoletana ed orgogliosi di essere tale. Quando siete andati via, tutte le piccole cose, le cose semplici per la quale non ci fai tanto attenzione, ma che ti riempiono il cuore, sono venute a mancare, e non immaginate quanto mi siete mancati. So che il bene, quello vero, e’ rimasto e rimane! Grazie!

La famiglia Manta, siete stati al mio fianco, mi avete sostenuta ed avete sempre creduto in me (la vostra piccola Montalcini). Vi ringrazio infinitamente per l’affetto e il supporto che mi avete sempre dato. Grazie di cuore!

As last but the most important acknowledgements go to my family and Claudio, to who I dedicate this thesis.

Mamma, Papa’, Nadia, Nonna, Giogio’, Maddalena, Riccardo e Carla…. voi siete la mia famiglia, un pilastro essenziale per tutto cio’ che faccio nella mia vita. Senza di voi non sarei mai riuscita a farcela. Mi avete sempre sostenuta con amore, pazienza e fiducia. Siete stati al mio fianco sempre e comunque, quando avevo piu bisogno
di voi….voi ci siete stati, ci siete e so che ci sarete sempre. Mi avete insegnato le cose fondamentali nella vita ed incoraggiato, guidata e sostenuta! Non so come ringraziarvi. Vi voglio un bene incredibile!

Claudio, tu sei stato e sei fondamentale. Sei venuto qui, lontano dai tuoi affetti per starmi vicina. E’ stato il gesto più grande che una persona potesse fare per me. Credo di non averli mai ringraziato abbastanza. Senza te al mio fianco io avrei mollato tanto tempo fa, non ci sarei mai riuscita. Tu mi hai insegnato a credere in me stessa, ad avere fiducia e a combattere quando le cose erano difficili ed io volevo mollare. Sei stato al mio fianco sempre, quando ero estremamente felice o delusa ed arrabbiata. Hai gioito per le mie vittorie ed hai pianto per le mie sconfitte. Hai vissuto ogni singolo momento e giorno al mio fianco, con amore e pazienza (so che ce ne vuole tanta) ed io te ne sono e sarò sempre grata! TA

So I am now ready to end this experience and step off this “rollercoaster” and turn page and start a new chapter of my life but I will bring along all these memories and thank everyone that has been part of this adventure and made me feel special and at home.

So, just to remember my terrible dutch Fridays : “Ik ben blij het allemaal met jullie te hebben gedeeld. Dank jullie wel”

Nicoletta
