Introduction

1 Learning Dynamics and the Support for Economic Reforms: Why Good News Can Be Bad
   1.1 Introduction .................................................. 1
   1.2 The support dynamics for economic reforms ................. 6
   1.3 Model .......................................................... 8
       1.3.1 Without aggregate uncertainty ......................... 9
       1.3.2 With aggregate uncertainty ........................... 13
       1.3.3 Summarizing ............................................. 18
   1.4 How can the loss-of-support problems be avoided? ......... 19
   1.5 Conclusion .................................................. 21
   1.6 Appendix ................................................... 23

2 Optimal Learning on Climate Change: Why Climate Skeptics Should Reduce Emissions
   2.1 Introduction .................................................. 27
   2.2 Related literature ............................................ 30
   2.3 Learning the causes of climate change ...................... 31
   2.4 Optimizing model ........................................... 36
       2.4.1 Characterization of past policy ....................... 38
       2.4.2 Characterization of optimal policy ................... 39
   2.5 Discussion .................................................. 45
   2.6 Conclusion .................................................. 47
PART II: A Model of Active Learning by Pricing

3 Actively Learning by Pricing: A Model of an Experimenting Seller 51

3.1 Introduction .................................................. 51
3.2 Relation to the literature .............................. 56
3.3 Model .......................................................... 57
3.4 Solving the model ........................................... 62
3.5 Price setting under active learning ................. 63
   3.5.1 Calibration .............................................. 63
   3.5.2 Model results ........................................... 64
3.6 Discussion .................................................. 76
3.7 Conclusion .................................................. 78
3.8 Appendix .................................................... 81

4 Using Dollarized Countries to Analyze the Effects of US Monetary Policy Shocks 83

4.1 Introduction .................................................. 83
4.2 Identifying monetary policy shocks ................. 87
4.3 Dollarized countries to the rescue ................. 89
   4.3.1 Estimation .............................................. 91
   4.3.2 Identification ........................................... 93
4.4 What are the effects of monetary policy shocks? 95
4.5 Why are the results different? ...................... 100
4.6 Are the results informative for the US? .......... 102
4.7 Conclusion .................................................. 104

5 Identifying US Monetary Policy Shocks Through Sign Restrictions in Dollarized Countries 107

5.1 Introduction .................................................. 107
5.2 Approach ..................................................... 111
5.3 Data and VAR specification ......................... 113
5.4 Results ........................................................ 114
   5.4.1 A somewhat more agnostic identification procedure 116
   5.4.2 An agnostic identification procedure ............ 118
   5.4.3 A not-so-agnostic identification procedure .... 119
