ACKNOWLEDGMENTS

To start at the beginning I would like to thank Joeri, Michiel and Jason for giving me the opportunity to work on this thesis and to stay involved with LOFAR after my master’s thesis project. The journey of the last few years was much like my frequent train trips to conferences - I spent quite a bit of time looking at the passing landscape and sometimes took the long way round (and then finding that I have to rush to catch the next train). Still, the last the last four and a half years working on my thesis went by pretty fast. I have my daily supervisors and co-promotors, Joeri and Jason, to thank for keeping me on track (bad pun, intended). Joeri, working with you has been a privilege. You are one of the most laid back people I know yet your style of working is one of the most efficient I have ever seen. You also have the uncanny ability to laugh at your own jokes before anyone else does and get away with it. Jason you a great guy, a bit of a one-man-army and having you as an advisor has surely benefited my thesis. Your Nerd Nite talk was legendary. Because I was in capable hands with my supervisors I did not have a lot of day-to-day dealings with you, but I would like to thank you, Michiel, for your advice and the occasional tie-breaker. I would also like to take the opportunity to thank my reading committee for going through this thesis and allowing me to defend it: Ralph Wijer, Raffaella Morganti, Wim Hermsen, Ben Stappers, Ed van den Heuvel and Anna Watts many thanks.

Without the larger LOFAR Pulsar Working Group, this thesis’ work would not have been possible. Anastasia you are indefatigable and I am thankful for the help and advice you gave me. Ben thanks for your help with the data processing in Manchester, hosting me when I visited and your great habit of asking the right questions at the right times. Thanks also to Vlad for a great conversation we had over Japanese food in Beijing. Kimon exploring Beijing with you was great and you showed how to really haggle. Tom, Aris N., Aris K., Sally, Evan, Jean-Mathias, Masaya, Michael,
Sander, Maciej, Maura, Charlotte, Patrick, Joris I enjoyed our pulsar busy weeks. I would also like to thank the Jenny, Don and Vishal for some of the early work on LOFAR pulsar searches. Thanks to my LOFAR fellow travelers in general and some in particular; Michael for giving me the best advice about PhD positions ever; John, fellow Pythonista, for the occasional programming help and for introducing me to “proper” whisky; Joe, Hanno, James, Ralph (for being a great if busy supervisor), thanks for the good time during my master’s research project; Bart, for many good conversations; Casey for being a great person generally; Gijs for your Blonde Diesel; Peeyush for your precise questions; Folkert; Antonia; Alexander; Ken; Lars.

It has been said before, but I am going to repeat it. Het Anton Pannekoek Instituut is a great place with a great atmosphere and that is something I hope will continue to hold true in the future. I would like to thank Minou, Esther, Milena, Susan, Lidewijde and Marijke for all help arranging paperwork and keeping the API running smoothly. Special thanks go out to Yuri for being a good friend with great sense of humor, a well-honed bad taste, and the patience to sit through a three-hour movie in Russian with Dutch subtitles (neither language he speaks) or to fix esoteric \texttt{LATEX} errors; and to Yvette for being a good friend, sharing more than a few beers and stories, and teaching me that laptops can be used to crack nuts. I am grateful of my generation of API PhD students for contributing to the good time I have had at the API: Gijs (guess where I came across a Finntrroll CD?), Konstantinos (great drummer and then some), Montse (always a cheerful presence), Maithili (never shy to set you straight), and Yi Yung (saved me in Beijing), Danai (exploring Beijing, sharing an interest in photography), Caroline (Beijing was great), Eduardo (mounaineer, sailor, story teller), Mikhail, Gerrit, Theo, Salome, Oscar, Sarka, Sjors, Alexandros, Frank, Daan, Peter P. (favorite drink: hot chocolate, whenever), Dario, Peter B., Lucas, Olga, Daniela, Stefano (I enjoyed the late night concerts), Frank, Smriti, Rik (great cook), Thijs, Daniela, Bart, Hanno, and also our new arrivals Mark, Riley, Abigail, Tomas, Georgi, Catia, Chris; Also: Alessandro (passive smoking breaks), Diego, Adam, Phil, Franka, Joel, Lucy, Adam, Bertrand, Matt, Hugues, Nanda, Jacco, Rudy (or Rude-y, I appreciate your frank appraisals), Lex (interesting conversations in the margins of LOCNOC meetings), Huib, Joop, Ton, Alex and Rens and of course Martin for helping to make our institute a great place. I would also like to thank ASTRON for their hospitality during my many trips to Lhee.

I want to thank some of my friends: Rosa for a great time at “Het Ketelhuis” and being one of the few people whose advice I will take to heart; Rick for many Rotterdam film festivals and long history (going back to Roman times . . . in high school that is); Lianne for being good company and kicking my ass when it needed kicking — much
appreciated; Kazi for beer, studying electro dynamics together, and then some; Joris for being an old friend, great flat mate, and one of the most interesting characters I know; Stephan for a summer of hard work, many sneak previews and great anecdotes; Peter, Barbara and Pieter for long days of hard work followed by beer and the occasional midnight screening; The “Het Ketelhuis” and “Filmhuis Cavia” crew I worked with for a great time; Conrado for showing me “De Zotte” and being a great host; Reinder for allowing me to work on a very interesting project and sharing a love of cinema;

And last, but most certainly not least my family. In particular my parents, Peter and Bernadette and my dear brother Jasper. I will keep it short here as I will have the opportunity to say thanks in person and in my mother tongue, but; Peter and Bernadette, thank you for having the patience to allow me to make up my own mind on things — and even then I find ways of being stubborn (I know). You have always been supportive of my choices and I very much appreciate that. Jasper, we have fought like brothers in the past, but I am proud of you. I look forward to many more stories of adventures in Sweden and I really want to see Stockholm for myself.

Which horizon I will be chasing next I don’t know yet, but I hope my new projects will be as interesting as the research I did for this thesis. To those of you who I forgot to thank: I am sorry, but sleep deprivation does wonders for your memory.
