Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

1	Introduction	1
1.1	Introduction for non-experts	1
1.2	Hurwitz numbers	4
1.3	Moduli space of curves	6
1.4	Cohomological field theories	7
1.5	CEO recursion	12
1.6	Results	13
I	Hurwitz numbers with completed cycles	21
2	Hurwitz numbers with completed cycles	23
2.1	Introduction	23
2.2	Hurwitz numbers with completed cycles	24
2.3	Semi-infinite wedge formalism	27
2.4	Computation of Hurwitz numbers	29
2.5	The cut-and-join operators	34
2.6	Strong piecewise polynomiality	41
2.7	An analogue of GJV-formula	45
3	CEO recursion for completed Hurwitz numbers	49
3.1	Introduction	49
3.2	The r -Bouchard-Mariño conjecture	50
3.3	Completed Hurwitz numbers as a matrix model	51
3.4	Spectral curve for the r -spin Hurwitz matrix model	56
3.5	Spectral curve and quantization	58
3.6	q -Double Hurwitz numbers	60
3.7	r -Spin Hurwitz numbers	63
3.8	Mixed case	65
4	Double ramification cycles	67
4.1	Introduction	67
4.2	Integral of ψ -classes over a DR-cycle: Theorem	68
4.3	DR-cycle times a ψ -class: splitting formulas	71
4.4	Generating functions for one ψ -class	80
4.5	Integrals of ψ -classes over a DR-cycle: Proof	82

II	Identification of Givental and CEO theories	91
5	Givental's action and CEO-recursion	93
5.1	Introduction	93
5.2	Givental group action as a sum over graphs	95
5.3	CEO-recursion as a sum over graphs	100
5.4	Identification of the two theories	109
III	Applications of Givental-CEO correspondence	113
6	The Norbury-Scott conjecture	115
6.1	Gromov-Witten theory of \mathbb{P}^1	115
6.2	The Norbury-Scott conjecture	117
6.3	Proof of the Norbury-Scott conjecture	117
7	ELSV and Bouchard-Mariño	123
7.1	Introduction	123
7.2	Polynomiality of the Hurwitz numbers	124
7.3	Proof of the Bouchard-Mariño conjecture	132
7.4	Topological Recursion/Givental correspondence revisited	140
7.5	New proof of the ELSV formula	144
8	The r-ELSV formula and the r-BM conjecture	147
8.1	Introduction	147
8.2	Completed cycles and completed Hurwitz numbers	151
8.3	The class \mathcal{S}	153
8.4	Equivalence of the r -ELSV and r -BM conjectures	154
