You will be contacted as soon as possible.
## Contents

1  General introduction and outline ................................................................. 7

2  Behavior of lipiodol markers during image-guided radiotherapy of bladder cancer ........................................................................................................................... 17

3  Finite element based bladder modeling for image-guided radiotherapy of bladder cancer ........................................................................................................... 31

4  A voxel-based finite element model for the prediction of bladder deformation.. 47

5  Automatic bladder segmentation on CBCT for multiple plan ART of bladder cancer using a patient-specific bladder model ......................................................... 65

6  Semiautomatic bladder segmentation on CBCT using a population based model for multiple plan ART of bladder cancer......................................................... 85

7  General discussion and conclusion ................................................................. 105

8  Appendices.................................................................................................. 115
    Summary ............................................................................................................ 117
    Samenvatting ..................................................................................................... 121
    Bibliography .................................................................................................... 125
    Acknowledgements .......................................................................................... 137
    List of publications .......................................................................................... 139
    Curriculum vitae .............................................................................................. 141
