ACKNOWLEDGMENT

This thesis is a summary of studies conducted at Kilifi District Hospital on severely ill children presenting with coma. I am most grateful to these children; they bear the greatest brunt of infectious diseases in the background of extreme poverty and poor health systems. Their willingness, through their parents and guardians, to participate in these studies has provided my colleagues and I with greater insights into their illnesses and given us the opportunity to help others better and work towards improved child survival in Africa. I dedicate this work to them.

My heartfelt gratitude to my PhD supervisors: Professors Charles Newton, Fenella Kirkham and Piet Kager. Their guidance and commitment to the success of my PhD work have been total, never accepting anything but my best efforts. Their humility and yet outstanding research backgrounds are inspiring.

To my colleagues Richard Idro, Eddie Chengo, Michael Kazungu, Ayub Mpoya, Judy Tumaini, Rachel Odhiambo, Michael Kihara, Greg Fegan, Simon Ndirangu, Godfrey Tuda, Nahashon Thuo, Moses Ndiritu, Esther Kivaya, Ken Obiero, Juliana Otieno, Michael Mwaniki, Hellen Gatakaa, Eric Ohuma, Bernhards Ogutu and the clinical, DSS and ICT teams; they had a big hand in the conduct of my studies and went beyond the call of their duties to support me. I am greatly indebted to them. To my friend Karijn Aussems who has been a constant source of moral support. Her commitment to help people with epilepsy from very poor backgrounds is inspiring and provides a redefinition of what such help should be like.
To my parents Oliver and Herine Gwer who have always encouraged me and my siblings to seek intellectual pursuits as a way out of poverty and disease. To my brothers Bernard, Stephen, Eddie and my auntie Dorcas; they encouraged and propped me up in many ways throughout the period of my studies. With such positivity and support from family, there was no other way for me but to complete what I had started. I am most grateful to them.

To Ann-Marie Awino Sadia, the love of my life and co-captain of my ship, and my little angels (sometimes little devils) Christian and Leo; they have kept me going even through the toughest of times. Because of them I am strong and blessed and shall forever be inspired to be a better person.

To God who makes all things possible.
