Acknowledgments

I would like to express my sincere gratitude to all the people that contributed directly or indirectly to the development of this thesis. There were many challenges that I had to overcome and without the collaboration and support of a lot of people this work would not have been possible.

First of all, I would like to thank the patients and healthy participants that joined this study; you were essential for this investigation. Also, many thanks to the VIP team and to all health care workers that collaborated with this project.

I am sincerely grateful to my promoters Prof. Dr. Don Linszen, Prof. Dr. Therese van Amelsvoort and co-promotor Nicole Schmitz for the opportunity to join this interesting research project. Dear Therese, I will always remember you saying “you are almost there, you are almost there!” even if it was still a bit far and yes here I am. Thank you for your guidance, trust and for being with me during all stages of my research. Your rapid response to my emails and questions, your prompt feedback to my articles and your pragmatic view were vital in the guiding process to a successful conclusion of my dissertation. Dear Nicole many thanks for your friendship, for your continuous support and valuable practical advices. I wished you were closer by; when you went to London I missed your expertise and your cheerfulness. Dear Don I arrived just on time to have the great privilege to work with you. Thank you for the opportunity
to work at your department, for your motivation, encouragement and contagious enthusiasm. Many thanks for all of you for reading my reports, commenting on my views and helping me to enrich my ideas. With you I learned important things for the world of science that were not taught in school.

I would also like to thank all of the members of my doctorate committee, Prof. Dr. A. Meyer-Lindenberg, Prof. Dr. C.B.L.M. Majoie, Prof. Dr. D. Denys, Prof. Dr. J.C.N. de Geus, Prof. Dr. H.E. Hulshoff Pol, Prof. Dr. J. Booij and Dr. M. A. Mehta for accepting the invitation for assessing my work and for approving it. Many thanks for the collaboration to all co-authors, Lieuwe de Haan, Gregor Hasler, Aart Nederveen, Nico Abeling, Martijn Figeé, Dick Veltman, Jacob Vorstman, Christina Lavini, Petra Pouwels. Christina, it was a pleasure spending hours with you for the MRS analysis, also thank you Petra Powels your insightful opinion about the spectra. Lieuwe, I admire your acuity and dedication to patient care that I was able to witness during “voorstelgesprekken”.

I also would like to thank people that made the completion of this dissertation possible by guiding me through various stages of my education, in special Dorret Boomsma, Eco de Geus, Gonneke Willemsen, Pieter Voorn, Wil Smeets, Herman Klijn and Antonio Ferreira Barbosa.

Martijn Figeé it was nice to start this project with you at the AMC and to hear that you could speak Portuguese, that moment I felt a little bit home. Then I met my first colleagues Julia Meijer, a Dutch person with a Brazilian soul, and Oswald Bloemen who invited Julia and me to share the office that he had “conquered”: the warmest office at the psychiatry department, then I completely felt home! Dear Oswald it was a great pleasure working with you, thank you for the nice time, for the golden research and no research related tips, for teaming up in Hong Kong we attended the full conference and saw almost all top visiting places!

My dear friend and paranimf Julia, you provided much of the laughs and entertainment to the department, you know the art of connecting people and keeping the spirits up. With you I have shared many of my professional and personal stresses and triumphs; like that unforgettable day with all stars of statistical significance blinking around me; together we were Glitter & Glamour; we did the ‘rebolecho’ before one the most beautiful imaging sessions of my life, conferences and great time abroad. I was so happy to share these and many other moments with you. Thank you so much for your friendship, for your interest in my work, for your
very intelligent and insightful comments on many of the complex aspects of my articles. You are a brilliant person.

Later on we moved to the third floor where I shared the best office of all with Eva Velthorst. Dear Eva thanks for the great time, many thanks for the teamviewer support, for remembering me that it was time for lunch when I was deeply focused and in the middle of my writing process. It was also nice to share with you views on important life subjects other than research.

I am very grateful to all my colleagues for the good time and for your willingness to help anytime: Erik Boot it was a pleasure working with you on the VCFS group, Marieken de Koning it is always so nice meeting you around, Bouke who started the b-day flowers and vrijbo culture, Sara it was nice jumping with you in London, Pisa and Florence I always appreciate your constructive opinions. Nikie, Daniela, Albertine, Marise, Lindy, Renata, Nienke, Carin, Dorien, Laura, Flor, Jet and also our lovely secretaries Berna and Annick – thank you! Special thanks to Marise who I shared thoughts around MRI research, and Johan whom I worked closely puzzling over many aspects of the MRI analysis; thank you for your contribution with Matlab scripting skills and your technical knowledge. Also thank you Paul Groot for your kind assistance with the technical aspects of the MRI experiments.

Jan Berend, it was a pleasure to get know in the period I was working in this thesis. Meeting you at the AMC or at the VU was a pleasant distraction from all the protocols. Thank you for sending the nice students to help me. Geor, Laura, Yan and Anne thank you for your help with the patients during the experiment day, SPSS, SPM, and Pubmed search.

My friends from the university: Naziah, I always believed you have a very high potential for research, the world of science needs your analytical talent. Ebru, you are a great example of patience and non-stress, that if we keep on going we will get there. Fatina we spent days and nights together on statistics and other complicated problems, thank you for your friendship and support.

Dear Anke, blond pony, crazy days during biopsy and master of neurosciences and crazy nights at the Melkweg, ubber-crazy during the PhD. I’m sure you had to be on my way for many important reasons. Thank you for your friendship.

Yan Shih, lieve vriendin and paranimf, you are always present; in fact you are a present to me. Spending time together with you is always so much fun. I love your optimistic, easygoing and uncomplicated attitude,
and we share the refined views and tastes of life. Not forget the delicious
taste of the Peking duck cooked by your parents which is the best culinary
reward after a hard working day of research.

Hoda I always feel very inspired after our meetings and meaningful
conversations. I hope we will have time to meet more often when you
finish your medical studies.

Dr. Naures we did it! We understand each other so well, thank you for
the gezellig time in Uilestede and the friendship that goes on.

Iveta with you I share the love for fashion and shopping. I’m also very
happy that we could share the concerns of PhD students.

Desi because of you I will never forget the value of the ‘global perspec-
tive’ with you and with Marcela I could breathe the fresh air outside with
our kids – the precious moments of relaxation that I needed during my
research breaks.

Alex I haven’t seen you for some years but I know you are a friend that
I can count at anytime. Thank you for reviewing the Portuguese summary
of this thesis. From all the Portuguese teachers I knew you are simply the
best.

Special thanks to my loyal Brazilian friends Alessandra, Jeni, Bar-
bara, Lurdinha, Eliene, Cláudia, Yara, Kátia and Eva – you are exceptional
friends. We are relatively far but always very close - you are the gifts of a
friendship that stand the test of time and distance. Obrigada por sempre
poder contar com vocês em todos os momentos.

Many thanks to my fabulous Brazilian friends living close by Anniele,
Nilva, Nice, Ana Luiza, Marta, Aleksandra and Daniela you were sources
of great laughter, joy, and support during these years of hard work.

Dear Corrie, Bert and the girls this is the place I reserved to you –
the closest possible to my family. Corrie, I will always think of you as a
big sister. You were with me since the beginning of my history in The
Netherlands. Thank you for the countless ways in which you have sup-
ported me during this and other endeavors. Thank you for being someone
who I could count on at anytime. You and your family have my unending
admiration and affection.

to my family: Meus pais, vocês são os meus melhores exemplos de
vida. Se hoje eu cheguei até aqui devo tudo a vocês que me educaram num
doce lar onde reina a união, a amor e muita disciplina. Minha querida
mainha, dois sentidos não assa milho – mas, o nosso assa. No seu em-
balo tudo anda para frente, com você eu aprendi lições importantes de
determinação e força de vontade. Meu querido painho, sua paciência e
tranqüilidade completam o nosso meu equilíbrio. Obrigada meus pais por todo carinho todos estes anos. Meus irmãos, o que seria de mim sem vocês? Vivendo aqui e tendo vocês aí fico mais tranqüila, pois nossos pais não estão sozinhos. Minha irmã, Inha do meu coração, você é uma pessoa excepcional sem igual. Obrigada por todo seu amor, por sua paciência e por essa alegria contagiante que você traz para nossa vida. Laís, minha sobrinha linda, para mim você vai ser sempre minha Cine. Meus pequenos já grandes irmãos Dolfo e Lindo, eu tenho muito orgulho de vocês. Aqui do outro lado do atlântico vocês nunca estão tão distantes para mim. A minha saudade é grande e o meu amor por vocês, minha família, maior ainda.

Finally, I owe my deepest gratitude to my fantastic husband, love, friend, and daddy of my little Marco - Tudor. You were everyday with me during my work for this thesis. The last year we had a quite busy life; both of us finishing our PhD theses, you having to combine this with your job. Most important we had to give our best care to our little Marco. I shared with you all my stress, concerns and also all the most happy moments. You are an extraordinary person. I’m so grateful for your unending patience and encouragement, your support and brilliant advices. Thank you for cheering me up with your creative and funny jokes, rich words, all the beautiful roses and your specialties for dinner. Thank you for your care and unconditional love. Marco, my sweetheart thank you for your thousands smiles, sweet kisses and warm hugs. I know it is so much fun with us that you do not even want to sleep. Mas, amor mamãe vai estar sempre aqui quando você acordar. Tudor and Marco, my life has been made infinitely richer because of you; you are the sun and the fun of my life.
