## TABLE OF CONTENTS

**Chapter 1**  General introduction  11

**Part I Central hemodynamics and arterial function in specific populations**

**Chapter 2**  Carriers of lecithin: cholesterol acyltransferase gene mutations have accelerated atherosclerosis as assessed by carotid 3T-MRI.  23

**Chapter 3**  Patients with low HDL-cholesterol caused by mutations in LCAT have increased arterial stiffness.  37

**Chapter 4**  Vascular aspects of Fabry disease in relation to clinical manifestations and elevations in plasma lysoGb3 markers.  51

**Chapter 5**  Arterial stiffness is increased in families with premature coronary artery disease.  65

**Chapter 6**  Pulse wave reflection and response to pharmacological vasodilation in post-coarctectomy patients.  83

**Chapter 7**  Determinants of wave reflection and their association with organ damage in post-coarctectomy patients.  97

**Part II Peripheral and central hemodynamics in intervention studies**

**Chapter 8a**  Effects on peripheral and central blood pressure of cocoa drinks with natural or high dose theobromine: a randomised double blind cross-over trial.  113

**Chapter 8b**  Supplemental data to: Effects on peripheral and central blood pressure of cocoa drinks with natural or high dose theobromine: a randomised double blind cross-over trial.  131

**Chapter 9**  Central versus peripheral blood pressure in malignant hypertension; effects of antihypertensive treatment.  137

**Chapter 10**  Effect of carvedilol versus metoprolol on peripheral and central hemodynamics in heart failure patients with genetic variants of the beta2-receptor.  149

**Chapter 11**  The short term effect of gastric bypass surgery on hemodynamics and baroreflex cardiovascular control.  163
Part III Wave reflection and postural change

Chapter 12  Active standing reduces wave reflection in the presence of increased peripheral resistance in young and old healthy subjects.  179
Chapter 13  Decreased wave reflection during passive head up tilt and active standing.  195
Chapter 14  Does the beta 2 adrenergic receptor influence the wave reflection response to standing?  207
Chapter 15  Summary and perspectives  214
