GUANGXUE HE

GUANGXUE HE was born on February 28, 1963 in Chifeng, China. In 1985 he obtained his bachelor’s degree in Public Health at the Department of Public Health at Baotou Medical College. After graduation, he worked in the epidemiology department of Inner Mongolia Medical University as a teaching assistant. In 1988 he entered the Beijing Tuberculosis (TB) Research Institute in conjunction with Peking Union Medical College and obtained an MSc Epidemiology in 1991. From 1991 to 2001 he worked at the Beijing Research Institute for TB control as a senior researcher and Director of the Department of BCG & TB surveillance (1991-1995), Director of the Department of International Cooperation and Research (1996-1999), and Director of TB Control and Prevention (1999-2001). In 2002, he started to work at the National Center for TB Control and Prevention, part of the China Center for Disease Control where he was eventually promoted to Senior Researcher and Director of the Department of International Cooperation and Research.

He also acts as the secretary & member of the TB Experts Committee for the Chinese Ministry of Health since 2004, standing member of the Beijing Anti-Tuberculosis Association since 2005, Vice-Director of Chinese TB Ethical committee since 2006, associate editor-in-chief of the Journal of the Chinese Anti-Tuberculosis Association since 2007, secretary & member of Chinese TB Operational Research Management Committee since 2007, and the chief manager of Damien Foundation China TB Project since 2011.

Guangxue He has been working in TB control and prevention for over 20 years and has gained expertise in clinical practice, surveillance, monitoring and evaluation, epidemiology and statistics, as well as control and prevention of (M/XDR) TB. Throughout his career, he has successfully designed, implemented, and conducted monitoring and evaluation within several national and international collaborative projects. He was involved in the nationwide random survey for the epidemiology of TB in China in both 2000 and 2010, as well as the nationwide anti-TB drug resistant baseline surveillance in China in 2007.

He is currently responsible for TB infection control, operational research and international cooperation at the National Center for TB Control and Prevention, Chinese Center for Disease Control and Prevention.
