Acknowledgements
I would like to begin by thanking my promoters Prof. Dr. Arthur Wilde and Prof. Dr. Nico Blom, and my co-promoter Dr. Sally-Ann Clur. I have no words to express my gratitude for the pillars of inspiration and support they’ve been. Although it was by chance that I came to be part of their team, I have become so engrossed in this field of work, and have imbibed so much through their mentorship that I feel this is exactly what I was destined for. Right from the start, when my learning curve was the steepest, to this day, when I am ready to defend my thesis, they have truly embraced me and encouraged my efforts; that meant an awful lot to me!

Arthur, there is so much one has to learn from you – tactfully balancing clinical work and academic commitments, being always available to all those who require your guidance, ensuring perfection and top quality in each and every aspect of work, and above all, leading a large and varied group in an extremely eloquent manner. You have relentlessly guided and supported me through all my endeavours, be it a study or a manuscript or a presentation; thank you very much!

Nico, from the moment I stepped in to EKZ, your genuine interest and passion, not only for pediatric cardiology, but also in shaping the careers of your colleagues, became apparent. Your friendly and casual demeanour made it possible for me to approach you whenever I had a question or required a word of approval. I truly appreciate your frequent checks to make sure that I felt at home and was enjoying myself. I always wonder how you manage to fulfil all your commitments at two massive university hospitals, and you do it with great flair! Thanks for all the support!

Sally, thank you for always being there for me, no matter what! Even during the busiest of times, you never thought twice about stopping and sorting out things for me. Our trip to Innsbruck and Istanbul were both such a hit! You’ve been a wonderful friend and a constantly motivating person in my research career, I’m immensely proud to have you as my co-promoter!

I would like to express my sincere gratitude to all the members of the Doctorate Committee for their involvement in this thesis and all my co-authors who extended their support and cooperation from far and beyond!

Big thanks go to my colleagues in Clinical Genetics, Nynke Hofman and Eline Nannenberg, for their support! Nynke, I specially thank you for the several occasions when you helped me with collecting data and with editing manuscripts. Eline, it has been great working with you on the sudden infant death syndrome project, thanks for all the help with the study protocol! I am indeed privileged to have you both as my paranymphs; thank you so much for your time and help with organizing everything!

I would like to particularly thank one and all in the pediatric cardiology department for being so patient with me. Dr. Irene Kuipers, my special thanks go to you for boosting my morale all the way through. In the world of research, disappointments are common; but you always had a positive word for me. And of course, your contribution to the Samenvatting chapter is invaluable! Dr. Ad Backx and Dr. Bart Straver, you not only provided expert assistance whenever I needed it, but also went out of your way to make sure things were going fine for me. And the car ride to and from Vaals was so
much fun with you guys; thanks a lot. Dr. Jan Lam, Dr. Annette Rackowitz, Dr. Robin Bertels and Dr. Bas Rebel, it was very enjoyable with you folks around, thanks for being so supportive when I was new to the department. Special thanks to the wonder-women of the department: Tilly, you have been an extraordinary help and have made so many things so much simpler for me, my sincere gratitude for all the efforts you took to make this happen. I have to specially thank you for all the pieces of translation you’ve done for me and for guiding my efficiently through this PhD maze.

And to my colleagues in Cardiology, what a pleasure it has been interacting with you! Dr. Pieter Postema, I am extremely thankful to you for teaching me the nuances and the ‘art’ of research! Dr. Christian van der Werf, you’ve been a great associate and I’ve thoroughly enjoyed working with you; my best wishes for your internship and your Promotie. Dr. A.S Amin, I can never forget my first day in AMC when I came knocking at your door, and of course your words of wisdom, then, and now, while preparing my thesis, have been invaluable! Regina and Piety, you were both really patient with me all these years, never once getting annoyed at the several times I’d trouble you. I thank you for your support!

Prof. Dr. Barbara Mulder, it was a pleasure working with you on the GUCH project. Thank you very much, for providing me the opportunity to start my doctoral research, and also for showing me the right direction.

I would like to thank the CONCOR team for their patience with me as I was settling down in AMC and in The Netherlands. I would like to thank Bart Goldhoorn (ICT) for his readiness to help out with all my technical tangles.

I am greatly moved by the innumerable times my friends have gone out of their way to help me achieve this goal. My sincere gratitude to the “truly special ISA community” - this would not have been possible without you! To my sweet and loving neighbours - you made our life in Amstelveen so enjoyable that it became easy for me to pursue my ambition, thank you! My word of thanks will not be complete without mentioning the special people who mean a lot to me: my friends, the true treasures I have gathered in the journey of life, and my family, who I can always count on! I know you are all happy for me and are wishing me well, as always, from different parts of the world.

My parents and parents-in-law have been supportive of my every aspiration and have shown tremendous confidence in me - I really appreciate that! And for my brother, he was and will always be my confidante and my source of inspiration, and I take this opportunity to thank him. I would like to specially acknowledge my grandfather, who at the age of 90, continues to work passionately and to contribute enormously to society – he is a shining example to the younger generation!

Gopi and Kavya, but for the constant love, encouragement and faith you showered on me, this would not have been possible. You have been extremely patient with me in my times of stress, have provided me the motivation to keep trying, and in short, have been the forces behind this success!
