Curriculum Vitae and Portfolio
Curriculum Vitae

Tara Gomes was born on February 7, 1982 in Toronto, Canada. She graduated from secondary school at St. John’s Kilmarnock in 2000. Following her graduation, she moved to Guelph, Ontario to commence a Bachelor in Sciences degree after receiving the prestigious President’s Scholarship from the University of Guelph. During her undergraduate studies, she completed a summer research project in epidemiology that led to her interest in completing graduate work in this area. Tara completed her BSc degree with a major in mathematics and a minor in biology in April 2004 and was awarded with the W.C. Winegard Medal upon graduation. She then pursued a Master’s of Health Science in Community Health & Epidemiology at the University of Toronto between September 2004 and December 2005. During this degree, a practicum placement at the Canadian Institute for Health Information introduced her to analysis of large administrative databases, which led to her employment at the Institute for Clinical Evaluative Sciences (ICES) as a biostatistician in 2006. Over the next several years, she worked in both research and the provincial government, gaining expertise in pharmacoepidemiology and health policy. In 2008, she joined the Ontario Drug Policy Research Network as an epidemiologist, and became the Scientific Lead and co-Principal Investigator in 2011. Since this time, Tara has conducted research in a variety of drug policy topic areas, including diabetes, anticoagulation, antipsychotics, and opioids. She is currently a Scientist at ICES and St. Michael’s Hospital, and an Assistant Professor at the University of Toronto.
Portfolio

Awards

1. 2016 Canada Health Infoway Data Impact Challenge II. Best Answer Award, Chronic Opioid Use category.

2. 2015 Recognition as one of Pharmacoepidemiology and Drug Safety’s Best Reviewers of the year.

3. 2015 Institute for Public Administration of Canada’s 2014 Bronze Public Sector Leadership Award for the Ontario Drug Policy Research Network

4. 2013 St. Michael’s Hospital Arthur Award for Project with Highest Research Impact.

5. 2009 Bruce Squires Award (CMAJ) for article most likely to influence clinical practice
