Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

1	General introduction and overview	1
1.1	Fractional integration	1
1.2	Fractional cointegration	4
1.3	Empirical application	6
1.4	Overview of the thesis	8
2	Estimation and inference of fractionally integrated time series	9
2.1	Introduction	9
2.2	Estimation of fractionally integrated series	11
2.2.1	Model and assumptions	11
2.2.2	Parameters and the likelihood function	11
2.2.3	Main theorems	13
2.3	Hypothesis testing	15
2.4	Finite sample simulations	17
2.4.1	Monte Carlo setup	17
2.4.2	Simulation results	18
2.5	Empirical application	21
2.6	Conclusions	22
2.7	Appendix	30
2.7.1	Preliminaries and notation	30
2.7.2	Additional lemmas	31
2.7.3	Proofs of main theorems	39
3	Testing for no fractional cointegration: a Monte Carlo study	45
3.1	Introduction	45
3.2	Testing for fractional cointegration	47
3.3	Finite sample performance	50
3.3.1	Monte Carlo setup	50
3.3.2	Simulation results	51
3.4	Empirical application	55
3.5	Conclusions	56
4	Dynamic OLS estimation of fractionally cointegrated regressions	69
4.1	Introduction	69
4.2	The model and preliminaries	71

4.3	Regression-based dynamic OLS estimation of cointegration vectors	73
4.4	Finite sample performance	79
4.4.1	Monte Carlo setup	79
4.4.2	Simulation results	80
4.5	Empirical application	82
4.6	Conclusions	84
4.7	Appendix	84
4.7.1	Preliminaries and notation	84
4.7.2	Additional lemmas	86
4.7.3	Proofs of main theorems	94
5	Likelihood-based inference in fractionally cointegrated systems	99
5.1	Introduction	99
5.2	Preliminaries: model, assumptions, parameters	101
5.3	Main results	105
5.4	Finite sample performance	109
5.5	Empirical application	112
5.6	Conclusions	114
5.7	Appendix	114
5.7.1	Preliminaries and notation	114
5.7.2	Additional lemmas	116
5.7.3	Proofs of main theorems	125
	Summary	127
	Samenvatting (Summary in Dutch)	129
	Bibliography	131
