Citation for published version (APA):
## Contents

1. **Introduction: Groups in Economics**  
   
2. **The Tragedy of the Commons Revisited: The Importance of Group Decision-Making**  
   2.1 Introduction  
   2.2 Experimental Design  
   2.2.1 General Design and Procedures  
   2.2.2 The Model  
   2.2.3 The Group Decision-Making Process  
   2.3 Theoretical Predictions  
   2.3.1 Part 1: Non-strategic Problem  
   2.3.2 Part 2: Strategic Game  
   2.4 Results  
   2.4.1 Part 1: Non-strategic Problem  
   2.4.2 Part 2: Strategic Game  
   2.4.3 Relating Part 1 to Part 2: Comparing Groups and Individuals  
   2.4.4 Group Decision-making  
   2.5 Conclusions  
   
   Appendix 2A: Instructions  
   Appendix 2B: Forward Lookingness and Pool Size  
   Appendix 2C: Groups and Individuals: Pool Size Differences  

3. **Cartel Formation and Pricing: The Effect of Managerial Decision Making Rules**  
   3.1 Introduction  
   3.2 Experimental Design and Procedures  
   3.3 Hypotheses  
   3.4 Results  
   3.4.1 General Overview  
   3.4.2 Cartel Formation  
   3.4.3 Cartel Stability  
   3.4.4 Prices  
   3.5 Conclusion  
   
   Appendix 3A: Instructions  
   Appendix 3B: Chat Analysis  

4. **Leadership in a Weak-Link Game**  
   4.1 Introduction  
   4.2 The Weak-Link Game  
   4.3 Leadership  
   4.4 Method
4.5 Results

4.5.1 Follower choice
4.5.2 Overcoming Coordination Failure in the Group
4.5.3 Leadership
4.5.3 Exogenous versus Endogenous Leadership

4.6 Conclusions

Appendix 4A: Instructions
Appendix 4B: Order Effects in the Weak-link Game
Appendix 4C: Leader, Minimum and Overall Choice Frequencies
Appendix 4D: Selfish or Servant Leadership? Leadership Personalities in a Weak-Link Game
