Chapter 9

Acknowledgements

ACKNOWLEDGEMENTS

First I would like to thank Fred Meyer for giving me the chance to work in the Sundt jr. research lab in Rochester Minnesota first as a research trainee and special project associate and later as the Sundt fellow. The experience has made a huge difference in my life and my career. Your help also later in my career has been priceless.

To Bob Anderson, I would like to thank you for all your mentoring. Your research skills and the incredible ability to fix anything have made a huge impression. I am proud to have worked with you.

To Heidi Martin, in the many hours we spent together in the lab working on our projects we became good friends. You are a wonderful person with incredible technical skills. I am happy for you that you have moved back to working with patients.

To Raph Thomeer, dear Raph thank you for welcoming me into the Leiden training program and mentoring me for 6 years. With your clear principles you have given me a strong base to do this difficult job.

To Gary Steinberg, dear Gary, as a cerebrovascular expert you are one of my examples. My year at Stanford has been an incredible experience. I have learned a lot and am to this day grateful for your advice on difficult cases.

To Peter Vandertop, dear Peter, my move to Amsterdam meant a new start. Your help and coaching in general and especially in getting this manuscript finished has been very pleasant. We have only just begun.

To professor Tulleken, professor Stam, professor Vermeulen, professor Van Bavel and professor Van Noorden; thank you for reviewing the manuscript and accepting to be on my "promotie commissie".

To my father, the loss of mum last year, who was the center of our small but loving family has been a huge blow. As we promised mum we will stick together and I hope to make you proud.

To Henk, you are my big brother, the one that will look after me no matter what. In the good and bad times you have been there. Your talent and ambition has inspired me.

To Peter, I realize that living with me is not always easy. In the 7 1/2 years we have been together a lot has changed but life is still getting better. The best part is spending it with you.
