## Contents

1 Introduction and Overview 1

2 Intergenerational risk sharing, pensions and endogenous labour supply in general equilibrium 9
   2.1 The command economy 12
      2.1.1 Individuals and preferences 12
      2.1.2 Investment and production 12
      2.1.3 The resource constraints 14
      2.1.4 The social planner’s solution 14
   2.2 The decentralized economy 15
      2.2.1 The pension systems 16
      2.2.2 Individual budget constraints 19
      2.2.3 Individual and firm optimization 19
      2.2.4 Market equilibrium conditions 20
   2.3 Optimality of pension systems 20
      2.3.1 Pension fund optimality conditions 20
      2.3.2 Optimality of different pension systems 21
   2.4 Discussion 23

Appendix to Chapter 2 25
   2.A Derivation of the planner’s solution 25
   2.B Individual first-order conditions 25
      2.B.1 Period 1 individual first-order conditions 25
      2.B.2 Period 0 individual first-order conditions 26
   2.C Infinite horizon model 27
      2.C.1 Notation 27
      2.C.2 Social Planner 27
      2.C.3 Decentralised economy 28
3 Sharing of Demographic Risks in a General Equilibrium Model with funded Pensions

3.1 The command economy ........................................ 34
  3.1.1 Individuals and preferences ............................... 34
  3.1.2 Demographics ............................................. 35
  3.1.3 Production ............................................... 35
  3.1.4 Resource constraints ..................................... 35
  3.1.5 The social planner’s solution .......................... 36
3.2 The decentralized economy .................................... 37
  3.2.1 The pension arrangements ............................... 37
  3.2.2 Individual budget constraints and generational accounts 40
  3.2.3 Individual and firm optimization ........................ 41
  3.2.4 Market equilibrium conditions .......................... 43
3.3 Optimal pension policy ....................................... 43
  3.3.1 The optimum under perfect demographic foresight ....... 44
  3.3.2 Demographic uncertainty ................................ 46
3.4 Calibration .................................................... 47
3.5 Numerical results ............................................ 48
  3.5.1 Measures for welfare comparison ........................ 48
  3.5.2 No demographic uncertainty .............................. 49
  3.5.3 Deterministic variation in demographic variables ....... 50
  3.5.4 Introducing demographic uncertainty .................... 53
  3.5.5 Fertility risk ............................................ 57
  3.5.6 Mortality risk ........................................... 58
  3.5.7 Simultaneous presence of both types of demographic risk 61
3.6 Robustness: varying the degree of risk aversion ............ 69
3.7 Conclusion .................................................... 70
Appendix to Chapter 3 ............................................. 73
  3.A Description of solution of model .......................... 73
  3.B Proof of Proposition 1 ...................................... 73
    3.B.1 Part (i) .................................................. 73
    3.B.2 Part (ii) .................................................. 75
  3.C Derivatives of expressions in Proposition 1 ................. 77
    3.C.1 DRB ....................................................... 77
    3.C.2 DWB ....................................................... 78
4 Voluntary Participation and Intergenerational Risk Sharing in a Funded Pension System

4.1 Introduction .............................................. 79
4.2 Model and autarky solution .............................. 83
4.3 Introduction of a pension fund ......................... 84
   4.3.1 Individuals ........................................ 85
   4.3.2 The pension fund .................................. 85
4.4 The participation constraint ............................ 87
   4.4.1 Recursive formulation of the participation constraint ... 89
   4.4.2 Equilibrium definition ............................ 90
   4.4.3 Solutions for $\tilde{r}$ ............................ 91
   4.4.4 Properties of the solutions for $\tilde{r}$ ............... 92
   4.4.5 Assumption about initial beliefs .................. 96
   4.4.6 Feasible pension fund rules ....................... 96
   4.4.7 The optimal pension fund rule .................... 98
4.5 A numerical example ..................................... 100
4.6 Conclusion ............................................. 107
Appendix to Chapter 4 ......................................... 108
   4.A Details on first-order condition pension fund without participation constraint ........................................... 108
   4.B Details on $U_p(r, \tilde{r}' = r)$ ........................ 108
      4.B.1 $U_p(r^*, \tilde{r}' = r^*)$ approaches $U^a$ from below as $r \uparrow r^*$ .......................... 108
      4.B.2 Second-order derivative of $U_p(r, \tilde{r}' = r)$ .................. 110
   4.C Calibration of the returns process .................... 111

5 Redesigning the Dutch occupational pension contract: Simulation of alternative contracts involving soft and hard entitlements 113

5.1 Introduction ............................................. 113
5.2 The Model .............................................. 116
   5.2.1 Demographics ........................................ 116
   5.2.2 Wage income and pension fund contributions .......... 117
   5.2.3 Second-pillar entitlements and liabilities under the old contract ..................... 118
   5.2.4 Assets ........................................... 120
   5.2.5 Economic shocks .................................... 121
   5.2.6 The timing ......................................... 122
5.3 Pension fund policy ...................................... 123
   5.3.1 The current contract ............................... 124
