Detection of biomarkers for lysosomal storage disorders using novel technologies
van Breemen, M.J.

Citation for published version (APA):
Table of contents

Prologue

Chapter 1  Introduction  11

Section I:  Biomarkers for Gaucher disease

Chapter 2  Identification and use of biomarkers in Gaucher disease and other lysosomal storage diseases  

Chapter 3  Marked elevation of the chemokine CCL18/PARC in Gaucher disease: a novel surrogate marker for assessing therapeutic intervention  

Chapter 4  Limitations in quantitation of the biomarker CCL18 in Gaucher disease blood samples by surface-enhanced laser desorption/ionization time-of-flight mass spectrometry  
Biochimica et Biophysica Acta 1764 (2006) 1626-1632  59

Chapter 5  Increased plasma macrophage inflammatory protein (MIP)-1α and MIP-1β levels in type I Gaucher disease  
Biochimica et Biophysica Acta 1772 (2007) 788-796  71

Chapter 6  Correction in plasma macrophage inflammatory protein (MIP)-1β is dose dependent during the initial phase of enzyme replacement therapy of type I Gaucher disease  
To be submitted as manuscript in shortened form  89

Chapter 7  Siblings with Gaucher disease type III: differential outcome due to timing of enzyme replacement and substrate reduction therapy  
Submitted  99

Chapter 8  Potential artefacts in proteome analysis of plasma of Gaucher patients due to protease abnormalities  
To be submitted with minor modifications  111

Chapter 9  Assessing the statistical validity of proteomics based biomarkers  
Analytica Chimica Acta 592 (2007) 210-217  127
Chapter 10  
Detection of mutant protein in complex biological samples: glucocerebrosidase mutations in Gaucher disease  
*Analytical Biochemistry* 372 (2008) 52-61

Section II: Biomarkers for Fabry disease

Chapter 11  
The Dutch Fabry cohort: diversity of clinical manifestations and Gb3 levels  
*Journal of Inherited Metabolic Disease* 30 (2007) 68-78

Chapter 12  
Limited value of serum protein profiling for discrimination of patients suffering from Fabry disease  
*Submitted*

Epilogue

Chapter 13  
Biomarkers for lysosomal storage diseases: identification and application as exemplified by chitotriosidase in Gaucher disease  
*Acta Paediatrica* 97 (Suppl. 457) (2008) 7-14

Addendum 1  
Proteomic profiling of plasma and serum of elderly patients with postoperative delirium  
*Submitted*

Chapter 14  
Summary and Discussion

Chapter 15  
Samenvatting en Dankwoord
