Targeting the vessel wall in cardiovascular prevention

Meuwese, M.C.

Citation for published version (APA):
CONTENTS

General introduction and outline of the thesis 9

PART 1 THE ENDOTHELIAL GLYCOCALYX

INITIAL STEPS IN TESTING A PROMISING CONCEPT

Introduction and outline 11

Chapter 1 The endothelial glycocalyx: a potential barrier between health and vascular disease 19
Current Opinion in Lipidology 2005;16:507-11, review

Chapter 2 Measuring endothelial glycocalyx dimensions in humans: a potential novel tool to monitor vascular vulnerability 27
Journal of Applied Physiology 2008;104:845-52, innovative methodology

Chapter 3 Sulphated glycosaminoglycans restore glycocalyx barrier properties of cultured endothelial cells in hyperglycemia 45
Submitted for publication, original research

Chapter 4 Effect of sulodexide on endothelial glycocalyx and albumin permeability in type 2 diabetic patients 55
Work in progress, original research

Chapter 5 Tumor Necrosis Factor-a inhibition protects against endotoxin-induced endothelial glycocalyx perturbation 67
Atherosclerosis 2008; in press, original research

Chapter 6 Partial recovery of the endothelial glycocalyx upon rosuvastatin therapy in patients with heterozygous familial hypercholesterolemia 83
In revision, original research

Chapter 7 Effect of chronic hyaluronidase infusion on atherosclerosis progression and kidney function in ApoE deficient mice 95
Work in progress, original research

Summary and perspectives 107
PART 2 MYELOPEROXIDASE

TESTING AN UPCOMING BIOMARKER

Introduction and outline 117

Chapter 8 Serum myeloperoxidase levels are associated with the future risk of coronary artery disease in apparently healthy individuals
The EPIC-Norfolk Prospective Population Study
Journal of the American College of Cardiology 2007;50:159-65, original research

Chapter 9 Myeloperoxidase levels are not associated with carotid atherosclerosis progression in patients with familial hypercholesterolemia
Atherosclerosis 2008;197:916-21, original research

Chapter 10 Diabetes mellitus type 2 is associated with higher levels of myeloperoxidase
Medical Science Monitor 2008; in press, original research

Chapter 11 Myeloperoxidase is not associated with scintigraphic myocardial perfusion abnormalities in type 2 diabetic patients with mild stable anginal complaints
Submitted for publication, original research

Chapter 12 Increases in myeloperoxidase levels after exercise in myocardial perfusion scintigraphy are not induced by myocardial ischemia
Clinica Chimica Acta 2008; in press, original research

Summary and perspectives 181
PART 3  ACYL COENZYME A:CHOLESTEROL ACYL TRANSFERASE INHIBITION

DISCARDING A NEW TARGET FOR THERAPY

Introduction and outline 187

Chapter 13  And then there were acyl coenzyme A:cholesterol acyl transferase inhibitors… 191
Current Opinion in Lipidology 2006;17:426-30, review.

Chapter 14  Ultrasound measurements of carotid arterial walls and the progression and regression of atherosclerosis 203
Nature Clinical Practice Cardiovascular Medicine 2008; in press, review

Chapter 15  Effect of ACAT inhibition on progression of carotid atherosclerosis in patients with familial hypercholesterolemia 221
The CAPTIVATE study
Submitted for publication, original research

Summary and perspectives 237

General summary/Samenvatting 241
Acknowledgements/Dankwoord 253
Publications 257
Conference abstracts 259
Co-authors and affiliations 261
List of abbreviations 263
