Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

LIST OF TABLES

Table 1.1:	The three mechanisms	28
Table 2.1:	Indicators of educational systems	48
Table 2.2:	Dependent variables	53
Table 2.3:	Regressions for the the dependent variables associated with labor market allocation	55
Table 2.4:	Regressions for the the dependent variables associated with inequality of educational opportunity	57
Table 3.1:	Descriptive statistics	69
Table 3.2:	Random intercept models with ISEI as dependent variable	70
Table 3.3:	Random intercept models for the Netherlands with ISEI as dependent variable	75
Table 4.1:	Descriptive statistics	90
Table 4.2:	Mean scores of cohort data for all countries	92
Table 4.3:	Random intercept models for <i>absolute</i> educational position with income as dependent variable	93
Table 4.4:	Random intercept models for <i>relative</i> educational position with income as dependent variable	94
Table 4.5:	Random intercept models for <i>absolute</i> educational position with ISEI as dependent variable	95
Table 4.6:	Random intercept models for <i>relative</i> educational position with ISEI as dependent variable	96
Table 5.1:	Descriptive statistics of individual level variables for the UK	114
Table 5.2:	Descriptive statistics of individual level variables for Germany	115
Table 5.3:	Descriptive statistics of all occupational variables	119
Table 5.4:	Bivariate correlations of all occupational variables	120
Table 5.5:	Multilevel random intercept models to estimate the wage effects of occupational closure in the UK.	123
Table 5.6:	Multilevel random intercept models to estimate the wage effects of occupational closure in Germany	125
