Frässdorf, J. (2012). *Anesthetic induced cardioprotection: from bench to bedside and retour*. [Thesis, fully internal, Universiteit van Amsterdam]. Boxpress.

General rights

It is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), other than for strictly personal, individual use, unless the work is under an open content license (like Creative Commons).

Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Table of contents

Part I: Introduction

Chapter 1: General Introduction and outline of this thesis

Chapter 2: Anaesthesia and myocardial ischemia/reperfusion injury

Part II: Morphine

Chapter 1: Morphine induces late cardioprotection in rat hearts in vivo: The involvement of opioid receptors and nuclear transcription factor κ B

Chapter 2: Physiological levels of glutamine prevent morphine-induced preconditioning in the isolated rat heart

Chapter 3: Morphine induces preconditioning via activation of mitochondrial K-Ca channels

Part III: Volatile anaesthetics

Chapter 1: Isoflurane preconditions myocardium against infarction via release of free radicals

Chapter 2: Intermittent pharmacological pretreatment by xenon, isoflurane, nitrous oxide, and the opioid morphine prevents tumor necrosis factor alpha – induced adhesion molecule expression in human umbilical vein endothelial cells

Chapter 3: Xenon induces late cardiac preconditioning in vivo: A role for Cyclooxygenase 2?

Chapter 4: Effects of nitrous oxide on the rat heart in vivo – Another inhalational anesthetic that preconditions the heart?

Part IV: The clinical Trial

Chapter 1: Impact of preconditioning protocol on anaesthetic-induced cardioprotection in patients having coronary artery bypass surgery

Part V: Back to basic

Chapter 1: The regulation of mitochondrial respiration by opening of mK(Ca) channels is age-dependent

Chapter 2: Ischaemic preconditioning phosphorylates mitogen-activated kinases and heat shock protein 27 in the diabetic heart

Chapter 3: Sevoflurane induced preconditioning: Impact of protocol and aprotinin administration on infarct size and endothelial nitric oxide synthase phosphorylation in the rat heart in vivo

Part VI: Main conclusion and general discussion

Chapter 1: Main conclusion

Chapter 2: General discussion

Chapter 3: Nederlandse samenvatting

Chapter 4: Duitse samenvatting

Part VII: Appendices

Appendix A: Acknowledgement

Appendix B: Bibliography

Appendix C: Curriculum vitae
