Duits, H. B. (2012). The added value of auditing in a non-mandatory environment Amsterdam: Vossiuspers UvA - Amsterdam University Press
Contents

1 Introduction 11
  1.1 Preface 11
  1.2 Research subject 14
  1.3 Research objective and research question 17
  1.4 Methodology 19
  1.5 Structure of the study 19

2 The demand for audit – evolution of a theory 21
  2.1 Introduction 21
  2.2 How agency theory became the paradigm in explaining the demand for audit 22
    2.2.1 The search for a theory for the demand for audit 22
    2.2.2 Agency theory and the theory of the firm 24
    2.2.3 The agency theory framework explaining the demand for audit 27
      2.2.3.1 Overview of empirical studies using Demand for Audit as dependent variable 27
      2.2.3.2 Overview of empirical studies using Demand for Audit as independent variable 30
      2.2.3.3 Concluding remarks 31
  2.3 Criticism brought forward against the paradigm: agency theory 32
    2.3.1 The view of the firm as a nexus of contracts 33
    2.3.2 Rational Expectations 34
    2.3.3 Self-interested utility-maximizing motivation of individual actors 37
    2.3.4 Dominant shareholder view 38
  2.4 Implications for theory-developing regarding the demand for audit 40
    2.4.1 Introduction 40
    2.4.2 View of the firm as an institution in society 41
    2.4.3 Decision making process of the agent 43
    2.4.4 Towards a post-modern agency theory, explaining the demand for audit? 46
  2.5 Concluding remarks 48
3 Study into variables explaining the demand for audit, hypotheses development and research model 51
3.1 Introduction 51
3.2 Overview of previous empirical research into variables explaining the demand for audit 52
  3.2.1 External agency relationships 52
    3.2.1.1 Shareholder (owner) – manager relationship 52
    3.2.1.2 Existence of debt in the capital structure of the firm 54
    3.2.1.3 Size 58
  3.2.2 Internal agency relationships 59
  3.2.3 Other considerations for the demand for audit 63
3.3 Hypotheses development and Research model 65
  3.3.1 Chronological overview of variables used in empirical demand for audit studies and hypotheses development 65
  3.3.2 Research model of this study 70

4 Data description 71
4.1 Introduction 71
4.2 Auditing in the Netherlands 71
  4.2.1 Historical development of the audit profession 72
    4.2.1.1 The early focus on the development of a theory of auditing and audit education 73
    4.2.1.2 Cultural differences and legal system 74
  4.2.2 Audit regulation 77
  4.2.3 Summary 80
4.3 Data selection 81
  4.3.1 Introduction 81
  4.3.2 Sample selection 82
  4.3.3 Data collection 83
    4.3.3.1 Methodology 83
    4.3.3.2 Collection of the survey data and response rate 85
  4.3.4 Description of the variables in this study 87
  4.3.5 Descriptive data 90
5  Empirical results I – Individual hypotheses  

5.1  Introduction  

5.2  External agency relationships  
5.2.1  Shareholder (owner) – manager relationship  
5.2.1.1  The position of shareholders to the company  
5.2.1.2  The proportion of management’s share in the equity of the company  
5.2.1.3  Perception of management of shareholder’s need  
5.2.2  Existence of debt in capital structure of the company  
5.2.2.1  Enhancing credibility to external users  
5.2.2.2  Leverage  
5.2.2.3  Debt covenants / Lending requirements  
5.2.2.4  Cost of debt capital and lending conditions  
5.2.3  Size  

5.3  Internal agency relationships  
5.3.1  Loss of control  
5.3.2  Existence of outside directors  
5.3.3  Audit as a substitute for internal control  
5.3.4  Improvement of quality of financial statements  

5.4  Other considerations  
5.4.1  Auditor relationship  
5.4.2  Financial health  
5.4.3  Strategic reasons  

5.5  Summary of the individual hypotheses  

5.6  Concluding remarks  

6  Empirical results II – Regression analyses  

6.1  Introduction  

6.2  Preliminary analyses  
6.2.1  Correlation and multi-collinearity  
6.2.2  Parsimonious tests  
6.2.3  Size as control variable  

6.3  Logistic regression model  
6.3.1  Introduction  
6.3.2  Multivariate analyses
6.4 Additional analysis on the relationship between (economic) facts and perception 146
6.5 Comparative analysis 150

7 Conclusions and discussion 157
7.1 Introduction 157
7.2 Summary and overall conclusions 158
7.3 Discussion 162
   7.3.1 Implications for the research regarding the demand for audit 162
   7.3.2 Practical implications for current audit practice 165
7.4 Limitations of this study 166
7.5 Further research 167

Appendices
I Questionnaire 170
II Results of Mann-Whitney Test for non response bias 175
III Multi collinearity: Tolerance and VIF tests 176
IV Treatment of missing values 182
V SPSS output full logistic regression model (table 6.7) 186
VI Results of Mann-Whitney Test for filing classification bias 188
