Bektaş Atasever was born on June 22, 1973 in Gülşehir, Turkey. He attended pre-university education at Caland Lyceum, Amsterdam. During his medical school of the University of Amsterdam he participated in basic research at the department of Nephrology (head professor Norman Siegel) of Yale University (USA). After his Medical Doctor degree he first conducted clinical research at the department of Cardiology, AMC Amsterdam, under supervision of prof.dr. Jan Piek. In 1993 he started his clinical PhD research at the department of Translational Physiology and Cardiothoracic Surgery of the AMC Amsterdam, which was supervised by his promotors prof.dr. Can Ince and prof.dr. Bas de Mol. The present thesis is a result of this research. During his PhD candidateship he worked as an assistant physician and co-initiated several bedside studies of the microcirculation at the department of Intensive Care (head prof.dr. Jan Bakker) of Erasmus University Medical Center and the department of Intensive Care (supervised by prof.dr. Johan Groeneveld; head prof.dr. Armand Girbes) of the VU University Medical Center. He also worked as an assistant physician for the department of Cardiothoracic Surgery (head drs. Alexander Vonk) and is one of the principal investigator of the Pulsatile Study in collaboration with the department of Anesthesiology (supervised by dr. Christa Boer; head prof.dr. Stephan Loer) of the VU University Medical Center. In 2010 he started his general practitioner (huisarts) training at the VU University Medical Center, Amsterdam, The Netherlands.
