Human liver cell lines for the AMC-bioartificial liver

Nibourg, G.A.A.

Publication date
2012

Citation for published version (APA):
Born on January 6th 1978 in Boxtel, the Netherlands, Gerardus (Geert) Adrianus Antonius Nibourg grew up as the elder brother of two sisters. After graduating from the Gymnasium at the Jacob Roelands Lyceum in Boxtel in 1996, he started a pre-clinical training at the University of Leuven, Belgium. After one year, he continued his studies at the University of Utrecht, the Netherlands. As a medical student he attended an operational clinical elective in South Africa, at the Tygerberg Hospital, University of Stellenbosch, Cape Town. His interest in surgery led him to participate in optional research projects at the departments of Experimental Nephrology (Prof. dr. M.C. Verhaar) and Surgical Oncology (Prof. dr. I.H.M. Borel Rinkes) at the University of Utrecht during his studies.

As a medical student, he enjoyed an optional clinical elective in South Africa, at the Tygerberg Hospital, University of Stellenbosch, Cape Town. His enthusiasm for scientific research translated in the participation in optional research projects at the departments of Experimental Nephrology (Prof. dr. M.C. Verhaar) and Surgical Oncology (Prof. dr. I.H.M. Borel Rinkes) at the University of Utrecht during his studies. To gain clinical experience, he started working as an emergency physician at the University Medical Center, Utrecht, after he had graduated from medical school in 2005. After this year, he started a PhD program at the Academic Medical Center (AMC), Amsterdam.

He lives together with his girlfriend Iris van Dijk in Amsterdam, and in his spare time, he loves to surf, read, play the piano, travel, and play field hockey.
