Cardiovascular diseases and dementia are diseases that have a major impact on our society. These diseases share a number of risk factors, including hypertension, hypercholesterolemia, smoking, diabetes mellitus, obesity and physical inactivity. One can imagine that even a small improvement in cardiovascular risk factor management in a large number of people can lead to a substantial beneficial effect on overall incident cardiovascular disease and maybe even postpone or prevent dementia. We can use eHealth to optimise cardiovascular risk management by developing internet interventions that focus on prevention. eHealth can also play an important role in improving research purposes. You can easily reach a wide audience, perform remote repeated measurements and provide patient-centred care at lower costs.

The aim of this thesis is to provide insight in the possibilities of cardiovascular prevention via eHealth and mHealth, and to show different aspects of cognitive functioning: assessing, predicting and preventing cognitive decline.

**Funding**
The research described in this thesis was financially supported by:
Project grants HATICE: the HATICE trial is funded by the European Union Seventh Framework Programme (FP7/2007-2013) under grant agreement number 305374.
Personal support S. Jongstra: A financial contribution to the printing costs of this thesis was provided by the Academic Medical Center in Amsterdam and financial support by the Dutch Heart Foundation for publication of this thesis is gratefully acknowledged.
EHEALTH IN CARDIOVASCULAR RISK MANAGEMENT
TO PREVENT COGNITIVE DECLINE

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. ir. K.I.J. Maex
ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen in de Agnietenkapel
op 22 september 2017, te 10.00 uur

door

Susan Jongstra
geboren te Maarssen
PROMOTIECOMMISSIE

Promotor:
Prof. dr. W.A. van Gool          AMC-UvA

Copromotores:
Dr. E. Richard            AMC-UvA
Dr. E.P. Moll van Charante  AMC-UvA
