Introduction 17
Outline of the thesis 23

Chapter 1 Socio-structural developments in the Netherlands 1945-2012 in relation to female employment patterns 27
1.1 Introduction 27
1.2 1945-1960 Breadwinners and housewives 29
1.3 1970-1980 Structural and cultural revolutions 30
1.4 1990-2010 A new consensus: the modified bread-winner model 34
1.5 Conclusion 37

Chapter 2 Theoretical framework and hypotheses 39
2.1 Introduction 39
2.2 Macro structural explanations 39
2.3 Cultural explanations 40
2.4 Explanations at branch and company level 41
2.5 Micro-economic explanations 41
2.6 Work preferences and employment behaviour 43
2.7 The influence of values and attitudes on preferences and behaviour 47
   Attitudes towards behaviour 47
   Subjective and descriptive norms 48
   Perceived behavioural control 49
   Behavioural, normative and control beliefs 49
   Sociological views on the impact of values and attitudes on employment patterns 51
   Opponents of the theory of planned behaviour and preference theory 54
   The problem of causality 54
   Constraints or preferences? 56
2.8  The social origins of values and attitudes

Socialization theory  59
Externalization, objectivation and internalization  60
Reification  60
Stratification theory  61
The reciprocal character of socialization  62
Primary socialization  63
Theory of social learning  64
Gender socialization  67

2.9  Secondary socialization

No need for emotional identification  69
The issue of consistency  70
Teachers  72
Partner  73
Peers  73
Supervisors and colleagues  74

Chapter 3  A qualitative typology of Dutch mothers’ employment narratives  77

3.1  Introduction  77
3.2  Brief historical overview of Dutch female employment patterns  77
3.3  Studies of factors of mothers’ labour participation  79
3.4  Women’s employment preferences: a matter of choice?  80
3.5  Research method  82
Research group  84
Interview questions  84
Interview analysis  86

3.6  Findings  86
Drifters  86
Privilegeds  90
Balancers  92
Ambitious  96

3.7  Conclusions and discussion  99

Chapter 4  The vital and stabilising role of work preferences within Dutch mothers’ labour market decisions  103

4.1  Introduction  103
4.2  Preferred number of work hours: cause or effect?  105
4.3  The impact of attitudes on preferences  107
4.4  Parental characteristics during childhood and its impact on mothers’ preferences and attitudes  110
Chapter 5  The social origins of Dutch mothers’ gender values and ideal family life

5.1 Introduction
5.2 Macro background: the specific case of the Netherlands
5.3 Theoretical framework
5.4 General values and personal ideals
5.5 Socialization theory
5.6 Secondary socialization: perceived professional and career support of significant others
5.7 Research method
5.8 Results
5.9 Conclusions

Chapter 6  Intermezzo: the full model

6.1 Introduction
6.2 Mothers’ labour participation
6.3 Number of work hours
6.4 Work preference
6.5 Ideal family life
6.6 General gender values
6.7 Mothers who work in order to become economically independent
6.8 Mothers who like to work
6.9 Conclusions
### Chapter 7 Exploring the social biographical patterns of Dutch mothers’ diverse gender and work attitudes

Nederlandse samenvatting (Dutch Summary): Ingebedde keuzes, onzichtbare beperkingen

Introduction 213
1 De feitelijke arbeidsparticipatie van een moeder is gebaseerd op het aantal uren dat ze wil werken 217
2 Het gewenste aantal werkuren van een moeder wordt beïnvloed door haar algemene rolovpvatting en persoonlijke gender- en arbeidsattitudes 218
Persoonlijke gender attitudes en algemene rolovpvatting 219
Persoonlijke arbeidsattitudes 221
3 Moeders algemene rolovpvattingen en gender- en arbeidsattitudes zijn beïnvloed door ouderlijke socialisatie tijdens de kindertijd 223
4 Een moeder onderschrijft meer egalitaire rolovpvattingen en attitudes wanneer ze eerder professionele en carrière-ondersteuning heeft ervaren van significante anderen 225
