If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: http://uba.uva.nl/en/contact, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.
Contents

1 Introduction
   1.1 Response Times and Their Role in Inferring Mental Organization
   1.2 Why a Model?
   1.3 The Diffusion Model
   1.4 Exploring Virgin Territory and Beyond
   1.5 Practice Effects: A Unitary Phenomenon?
   1.6 Sequential Effects
   1.7 Accurate Responding and Guessing: Two Extremes of the Same Process?
   1.8 Temporal Dynamics of Speeded Decision Making

2 A Diffusion Model Decomposition of the Practice Effect
   2.1 Introduction
   2.2 Power Law Theories of Automatization
   2.3 The Power Law Repealed?
   2.4 Interim Conclusion: State of the Field
   2.5 The Ratcliff Diffusion Model
   2.6 Experiment
   2.7 Discussion
   2.8 The Bayesian Ratcliff Diffusion Model
   2.9 Results for the Variability Parameters

3 Task–Related vs. Stimulus–Specific Practice: A Diffusion Model Account
   3.1 The Diffusion Model
   3.2 Method
   3.3 Results

4 Testing Theories of Post–Error Slowing
   4.1 Explanations for Post–Error Slowing
   4.2 A Drift Diffusion Model Decomposition of Response Times
   4.3 From Process to Parameter: A Drift Diffusion Model Perspective on Post–Error Slowing
   4.4 Method
   4.5 Results and Discussion
