Faculteit der Natuurwetenschappen, Wiskunde en Informatica

The work described in this dissertation has been carried out in the Computational Science research group of the University of Amsterdam. I would like to acknowledge the financial support of the European Union through the projects DynaNets (EU project no: FET-233847), and ViroLab (EU project no: IST-027446). Furthermore I would like to acknowledge the financial support from an EMBO Short-Term Fellowship and a travel grant from the BioRange program of the Netherlands Bioinformatics Centre (NBIC) and Netherlands Genomics Initiative (NGI).
