You will be contacted as soon as possible.

Acknowledgements

First and foremost I'd like to thank prof. Peter Sloom for his supervision of my PhD. Peter has given me structure and direction in times that this was necessary but also given me a lot of freedom for pursuing collaborations, both in the Netherlands and abroad. He has taught me that great ambition and scientific independence come with great responsibilities.

In addition I'd like to thank my co-supervisor prof. Jaap Kaandorp. He was able to light the spark for my interest in biology and prepare me to be a true systems biologist.

Furthermore, I'd like to thank prof. Eran Segal who supervised me during my stay at the Weizmann Institute of Science. He was able to offer me a research environment of the highest level and a place where I could get experience in a wet-lab.

I am grateful to all the colleagues in the Computational Science group in Amsterdam: Emiliano, Gokhan, Rick, Narges, Chinh, Breannan, Alfons, and the colleagues of the Segal lab of computational biology in the Weizmann Institute: Lucas, Ohad, Eilon, Maya, Michal, Tali, Noam, Shai, Leeat.

I would like to thank Emiliano Mancini, Pierre Rezus, Ruben van Loon and Jordy Klaver for helping me during my defense and for being great friends.

Countless hours of scientific discussion were spent with Marten Postma, whom I'd like to thank for inspiring me in achieving the highest level of science.

I especially would like to thank Lucas Carey for intense collaboration at the highest level and for teaching me to be an experimental biologist. In addition I'd like to thank Gokhan Ertaylan for a wonderful and fruitful collaboration.

Finally, I'd like to thank my sister, Diana, and my parents, Mira and Hein, for their unconditional love, support, and inspiration.
