Contents:

I. General introduction and outline of the thesis

II. Neo-adjuvant treatment for metastatic disease of colorectal origin

1. Unresectable peritoneal carcinomatosis from colorectal cancer: a single center experience.

III. Cytoreductive surgery and HIPEC for peritoneal carcinomatosis of colorectal origin

1. **The Treatment of peritoneal carcinomatosis of colorectal cancer with complete cytoreductive surgery and hyperthermic intra-peritoneal peroperative chemotherapy (HIPEC) with Oxaliplatin: a Belgian multicentre prospective phase II clinical study.**

2. **The use of Oxaliplatin or Mitomycin C in HIPEC treatment for peritoneal carcinomatosis from colorectal cancer: a comparative study.**

3. **HIPEC in T4a colon cancer: a defendable treatment to improve oncologic outcome?**
IV. RFA in colorectal liver metastases treatment

1. Radiofrequency ablation as a treatment tool for liver metastases of colorectal origin.  

2. Morbidity and mortality of laparoscopic vs. open radiofrequency ablation for hepatic malignancies.  

3. Laparoscopic liver resection using radiofrequency coagulation.  

V. General Discussion

VI. Conclusions
