Content, Causes, and Consequences

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. ir. K.I.J. Maex

ten overstaan van een door het College van Promoties ingestelde
commissie, in het openbaar te verdedigen in de Aula der Universiteit
op woensdag 13 september 2017, te 11:00 uur
door Anne Cornelia Kroon
geboren te Driebergen-Rijsenburg

Promotiecommissie

Promotor: Prof. dr. R. Vliegthart, Universiteit van Amsterdam

Copromotor: Dr. M. Van Selm, Universiteit van Amsterdam
Dr. C. L. Ter Hoeven, Universiteit van Amsterdam

Overige Leden: Prof. dr. M. N. C. Aarts, Universiteit van Amsterdam
Prof. dr. C. J. I. M. Henkens, Universiteit van Amsterdam
Prof. dr. B. I. J. M. Van der Heijden, Radboud Universiteit
Dr. M. J. Van der Goot, Universiteit van Amsterdam
Prof. dr. J. Peter, Universiteit van Amsterdam

Faculteit: Faculteit der Maatschappij- en Gedragwetenschappen

Voor mijn lieve ouders

Contents

1	Dissertation overview	2
2	Framing workforce aging by organizations and the news media	52
3	Stereotypes of older workers in organizational and news media	84
4	Effects of media stereotypes of older workers on the individual level	114
5	Effects of media stereotypes of older workers on the aggregate level	152
6	Managerial communication with older workers	180
	Summary	214
	Nederlandse samenvatting	218
	Author contribution	224
	Acknowledgements (Dankwoord)	228

List of Tables

2.1	Descriptive statistics of frames and sources in news media, annual reports, and employee magazines	65
2.2	Diagnostic and prognostic framing by type of content	69
2.3	Multilevel models explaining frame variation of older workers' employability	72
2.4	Intercoder reliability per variable	82
3.1	Operationalization and theoretical origin of stereotype elements	97
3.2	Negative and positive stereotype elements across annual reports, employee magazine articles, and news articles	100
3.3	Negative and positive stereotypes about older workers in organizational and news media	101
3.4	Multilevel model explaining percentage of negative relative to positive stereotypes	103
4.1	Correlations, means, and standard deviations for the endogenous variables	129
4.2	Mean differences between groups	131
4.3	Unstandardized parameter estimates of the Structural Equation Model predicting intentions to hire an older worker with implicit competence and warmth stereotypes	134
4.4	Mean differences between groups on explicit warmth and competence stereotypes	149
4.5	Unstandardized parameter estimates of the Structural Equation Model predicting intentions to hire an older worker with implicit competence and warmth stereotypes	150

5.1	Bivariate correlations	166
5.2	Explaining age discrimination claims with exogenous events, public opinion data and media variables.	169
6.1	Sample information Study 1	190
6.2	Overview of the interaction between barriers located on different levels of analysis and three key supportive domains of older workers' employability	195
6.3	Correlations, means and standard deviations	199
6.4	Differences in barrier strength across younger and older managers, and those who supervise low educated and highly educated older workers	203
6.5	Unstandardized parameter estimates of the probit Structural Equation Model predicting intentions to promote an older worker with managers' communication barriers.	204

List of Figures

1.1	Dissertation overview	18
2.1	Attention for older workers' employability in organizational and news media and unemployment rates among workers aged 45 – 65	67
3.1	Warmth and competence stereotypes of older workers in organizational and news media	102
4.1	Conceptual model	122
4.2	Theoretical model and results – Standardized parameter estimates of structural equation model predicting intentions to hire older employees.	135
4.3	Stimulus material - Dutch part 1	145
4.4	Stimulus material - Dutch part 2	145
4.5	Theoretical model and results – Standardized parameter estimates of structural equation model predicting intentions to hire older employees with explicit warmth and competence stereotypes	149
5.1	News media attention for older workers	165
5.2	Negative (upper) and positive (lower) stereotypes about older workers	165
6.1	Conceptual model and study overview	188
6.2	Standardized parameter estimates of the probit Structural Equation Model predicting intentions to promote an older worker with managers' communication barriers	205

6.3	Overview of first- and second order categories and communication barriers	213
