List of Tables and Figures

Table 1-1. Mongolian GDP, revenues, total expenditures, net international borrowing and net international lending. _____	13
Table 1-2. Poverty data of Mongolia _____	14
Table 4-1. GDP, capital- and labour-productivity, and TFP for Mongolia from 1980 until 2001. GDP and capital are expressed in billions of tugriks (constant 1995 prices) and labour in thousands of persons times schooling years. _____	89
Table 5-1. Differences in demographic and socio-economic background between subsamples _____	119
Table 5-2. Descriptive statistics of the expectations and fulfilment _____	125
Table 5-3. Descriptive statistics of the perceived outcomes and t-tests of differences between outcomes and expectations _____	130
Table 5-4. Evaluation of the transition's influence upon personal life and the outcomes _____	131
Table 5-5. Multivariate analyses of the effects of education, age, and gender upon the expectations, the evaluation and outcomes _____	131
Table 5-6. Multivariate analyses of the effects of occupational background prior to the transition (in 1990) upon the expectations, the evaluation and outcomes _____	132
Table 5-7. Multivariate analyses of the effects of occupational background after the transition (in 2005) on the expectations, the evaluation, and outcomes _____	132
Table 5-8. Overview of main expectations prior to transition (in 1990) _____	134
Table 5-9. Overview of main outcomes _____	136
Table 5-10. Univariate analyses and descriptive statistics of the effect of tertiary education on positive expectations _____	144
Table 5-11. Univariate analyses and descriptive statistics of the effect of occupational level in 1990 on positive expectations for personal life _____	144
Table 5-12. Univariate analyses and descriptive statistics of the effect of occupational level in 2005 on positive expectations for personal life, outcomes, and evaluation _____	145
Table 5-13. Univariate analyses and descriptive statistics of the effect of sector of employment in 2005 upon negative outcomes and evaluation _____	145
Table 5-14. Univariate analyses and descriptive statistics of the effect of tertiary education on positive expectations _____	146
Table 5-15. Univariate analyses and descriptive statistics of the effect of occupational level in 1990 on positive expectations for personal life _____	146
Table 5-16. Univariate analyses and descriptive statistics of the effect of occupational level in 2005 on positive expectations for personal life, outcomes and evaluation _____	146
Table 5-17. Univariate analyses and descriptive statistics of the effect of sector of work in 2005 upon negative outcomes and evaluation _____	147
Figure 2-1. Basic framework – the six steps of the policy-making cycle _____	23
Figure 2-2. An extension of the basic framework: the conceptual framework and its constituent elements _____	28
Figure 2-3. An extension of the basic framework: the conceptual framework influenced by the elements history, culture and geography _____	29
Figure 2-4. An extension of the basic framework: the institutional framework and its constitutive elements _____	30

Figure 2-5. An extension of the basic framework: the institutional framework influenced by the elements history, culture and geography. _____	32
Figure 2-6. The extended framework of policy analysis and evaluation _____	34
Figure 2-7. A comparison of all elements of the basic framework for 2 countries or organizations _____	50
Figure 4-1. Relation between the gradients of g in optima $m = (m_1, m_2)$ and $(a_1 m_1, a_2 m_2)$ and their invariance under similarity transformations of two ratio scales. ___	80
Figure 4-2. Development of TFP in Mongolia since 1980 _____	92
Figure 4-3. Effects of individual variations in GDP, investments and depreciation rate on the ratio of the TFP-values for successive years, with $\alpha = \frac{1}{3}$. _____	102
Figure 4-4. Effects of combined variations in GDP, investments and depreciation rate on the ratio of the TFP-values for successive years, for $\alpha = \frac{1}{3}, \frac{1}{2}$ and 0.69. _____	103
Figure 4-5. Simulation results for scenarios (i)-(iii). _____	106
Figure 4-6. (a) TFP as a function of the percentage of closed enterprises in scenario (iv); (b) Corresponding behaviour of GDP. _____	108
Figure 5-1. Age of respondents _____	117
Figure 5-2. Occupational level of the respondents in 1990 and 2005 _____	118
Figure 5-3. Occupational level of the parents _____	118
Figure 5-4. Respondents' sector of work in 1990 and 2005. _____	118
Figure 5-5. Expectations for personal life and society in 1990. _____	124
Figure 5-6. Fulfilment of expectations for personal life and society. _____	124
Figure 5-7. Perceived outcomes of the transition in 2005 and maximum expectations (for personal life or society). _____	129
Figure B4-1. Values of $a_\alpha(t)$ for Mongolia. _____	171
Figure B4-2. Function (52) for $\dot{A}(t)/A(t)$ derived with the computational procedure of Section B4.2.3 (solid line). _____	175
Figure B4-3. Fit to the yearly relative GDP-growth data of Mongolia. _____	177
Figure B4-4. Yearly relative growth $\dot{K}(t)/K(t)$ and $\dot{L}(t)/L(t)$ of capital K and labour L for the period 1985-2000 in Mongolia. _____	177
