If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

# TABLE OF CONTENTS

<b>Chapter 1 Introduction</b> .....	1
1.1 General Concepts of Biomineralization.....	2
1.2 Biocalcification in Scleractinian Corals and Mollusks.....	5
1.3 Why to Study Biomineralization Proteins of Aquatic Calcifiers.....	12
1.4 Outline of the Thesis.....	15
<b>Chapter 2 Novel Molluskan Biomineralization Proteins Retrieved from Proteomics: a Case Study with Upsalin</b> .....	19
2.1 Introduction.....	21
2.2 Background.....	22
2.3 Materials and Methods.....	25
2.3.1 Sample collection and characterization.....	25
2.3.2 General strategy for the identification of Upsalin.....	26
2.3.3 Identification of a cDNA fragment.....	27
2.3.4 Rapid amplification of cDNA ends (5'- and 3'-RACE).....	28
2.3.5 Purification, amplification and sequencing.....	29
2.3.6 Amplification of the full nucleotide sequence and quantitative real-time PCR.....	30
2.3.7 <i>In silico</i> analysis of the deduced amino acid sequence.....	31
2.3.8 Extraction of the shell organic matrix.....	31
2.3.9 Protein purification and characterization on mono-dimensional gel and on Western blots.....	32
2.3.10 Proteomic analysis of the purified fraction.....	33
2.3.11 Antibody production and ELISA testing.....	34
2.3.12 Glycosylation studies.....	34
2.3.13 <i>In vitro</i> interaction of the purified protein with calcium carbonate.....	35
2.3.14 Immunogold localization of the purified protein on shell fragments.....	36
2.4 Results.....	36
2.4.1 Characterization of <i>Unio pictorum</i> shell.....	36
2.4.2 Identification of a nucleotide sequence coding for a 12 kDa protein.....	37
2.4.3 Primary structure and molecular features of Upsalin.....	39
2.4.4 Tissue specific gene expression of Upsalin.....	41
2.4.5 Homology search.....	42

2.4.6	Purification and characterization of Upsalin by SDS-PAGE from shell extracts.....	44
2.4.7	Glycosylation of Upsalin.....	47
2.4.8	<i>In vitro</i> crystallization assay with purified Upsalin.....	48
2.4.9	<i>In situ</i> localization of Upsalin in the shell.....	50
2.5	Discussion.....	51
<b>Chapter 3 The Skeletal Proteome of the Coral <i>Acropora millepora</i>: the Evolution of Calcification by Co-option and Domain Shuffling</b>		<b>55</b>
3.1	Introduction.....	57
3.2	Background.....	59
3.3	Materials and Methods.....	61
3.3.1	Skeletal collection and SEM observations.....	61
3.3.2	Organic matrix extraction.....	62
3.3.3	ASM/AIM analysis on 1D and 2D gel electrophoresis.....	64
3.3.4	Proteomic analysis.....	65
3.3.5	<i>In silico</i> analysis of the SOMPs.....	66
3.3.6	Homology analysis and protein comparisons at the domain level.....	67
3.4	Results and Discussion.....	68
3.4.1	Analysis of the matrix on gel.....	68
3.4.2	Identification and characterization of SOMPs.....	70
3.4.3	Proteins with transmembrane domains.....	84
3.4.4	SOMPs in early stages of calcification affected by high CO <sub>2</sub> .....	86
3.4.5	Homology comparison between <i>Acropora</i> , <i>Nematostella vectensis</i> and <i>Hydra magnipapillata</i> .....	88
3.5	Conclusions.....	94
<b>Chapter 4 Biomineralization Toolkit: the Importance of Sample Cleaning Prior to the Characterization of Biomineral Proteomes</b>		<b>97</b>
4.1	Concerning Coral Skeletal Proteomes.....	99
4.2	Concerning Proteomes Associated to Calcium Carbonate Structures in Other Metazoans.....	102
<b>Chapter 5 The Skeleton of the Staghorn Coral <i>Acropora millepora</i>: Molecular and Structural Characterization</b>		<b>111</b>
5.1	Introduction.....	113
5.2	Background.....	114
5.3	Materials and Methods.....	117
5.3.1	Sample collection and cleaning.....	117
5.3.2	Microstructural analysis.....	118
5.3.3	Skeletal organic matrix extraction.....	118

5.3.4	Organic matrix characterization on mono-dimensional gels and Ca-overlay test.....	119
5.3.5	Analysis of the protein content of the SOM by proteomics.....	120
5.3.6	Analysis by Fourier Transform Infrared Spectrometry (FTIR-ATR) and by Raman spectroscopy .....	120
5.3.7	Sugar analysis .....	121
5.3.8	<i>In vitro</i> crystallization tests in the presence of ASM.....	122
5.4	Results.....	123
5.4.1	Skeletal morphology and microstructure.....	123
5.4.2	Skeletal organic matrix on gel .....	126
5.4.3	Fourier transform IR of the ASM and AIM.....	126
5.4.4	Monosaccharide composition of the ASM and AIM.....	129
5.4.5	Characterization of skeletal organic matrix proteins (SOMPs).....	130
5.4.6	<i>In vitro</i> interaction of the acid soluble matrix with CaCO <sub>3</sub> .....	134
5.5	Discussion.....	139
<b>Chapter 6 Conclusions and Perspectives .....</b>		<b>147</b>
Appendix A .....		154
Appendix B .....		158
Appendix C.....		183
References .....		187
Samenvatting.....		207
Publications.....		211
Submitted Publications .....		212
Acknowledgements .....		213
