You will be contacted as soon as possible.
Contents

1 Introduction
  1.1 Hypothesis Testing, an Example: The t Test .......................... 1
  1.2 Various Measures of Evidence ........................................... 2
  1.3 The Bayes Factor ......................................................... 3
  1.4 Outline ................................................................. 4

I Bayesian Model Selection: Theoretical 9

2 How to Quantify Support For and Against the Null Hypothesis: A Flexible WinBUGS Implementation of a Default Bayesian t test 11
  2.1 Introduction ............................................................ 12
  2.2 Bayesian Hypothesis Testing ........................................... 13
  2.3 SD: An MCMC Sampling Based t Test ................................ 15
  2.4 The One-Sample SD t Test: Comparison to Rouder et al. ............ 17
  2.5 The Two-Sample SD t Test: Comparison to Rouder et al. .......... 18
  2.6 Extension 1: Order-Restrictions ...................................... 19
  2.7 Extension 2: Variances Free to Vary in the Two-Sample t Test .... 20
  2.8 Summary and Conclusion ............................................... 24

3 An Encompassing Prior Generalization of the Savage-Dickey Density Ratio 27
  3.1 Introduction ............................................................ 28
  3.2 Bayes Factors from the Encompassing Prior Approach ............... 28
  3.3 The Borel-Kolmogorov Paradox ....................................... 33
  3.4 Concluding Remarks .................................................... 37

4 A Default Bayesian Hypothesis Test for Correlations and Partial Correlations 39
  4.1 Introduction ............................................................ 40
  4.2 Frequentist Test for the Presence of Correlation .................... 41
  4.3 Frequentist Test for the Presence of Partial Correlation .......... 42
  4.4 Bayesian Hypothesis Testing .......................................... 43
  4.5 Default Prior Distributions for the Linear Model ................... 44
  4.6 The JZS Bayes Factor for Correlation and Partial Correlation .... 47
  4.7 Concluding Remarks .................................................... 49

5 A Default Bayesian Hypothesis Test for ANOVA Designs 51
  5.1 Introduction ............................................................ 52
  5.2 Bayesian Inference ..................................................... 52
  5.3 Linear Regression, ANOVA, and the Specification of g-Priors ....... 54
  5.4 A Bayesian One-Way ANOVA .......................................... 57
  5.5 A Bayesian Two-Way ANOVA .......................................... 60
