#### **Disclaimer/Complaints regulations**

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

# Contents

---

1	Introduction	p. 7
2	Testing and Modeling Non-Normality within the Linear Factor Model	p. 13
3	Testing and Modeling Non-normality within the Graded Response Model	p. 41
4	Non-normality in the Second-order Factor Model: Modeling Ability Differentiation	p. 73
5	Modeling Non-normality due to Differentiation: The Method of Moderated Factor Analysis	p. 93
6	Using the Heteroscedastic Factor Model to Detect Specific Genotype by Environment Interactions in the Classical Twin Design	p. 127
7	Heteroscedasticity due to Genotype by Environment Interactions: An application to Cognitive Ability Data from 14 Different Studies	p. 155
8	Discussion	p. 173
	Appendix. How to Calculate Power using the Likelihood Ratio Test: Sex Differences in Intelligence Tests Scores	p. 183
	References	p. 203
	Dutch Summary	p. 221
	Credits	p. 225
