Contents

1 Introduction and overview ................................. 1

2 Reduced-rank time-varying vector autoregressions .... 7
   2.1 Introduction ........................................ 7
   2.2 Model ............................................. 11
      2.2.1 Full-rank model ................................ 11
      2.2.2 Reduced-rank model ............................ 13
   2.3 Bayesian estimation procedure for reduced-rank model .... 16
      2.3.1 Draw a history of regression parameters \( \theta^\tau \) ................. 18
      2.3.2 Draw a reduced-rank covariance matrix \( Q_\theta \) .................. 21
      2.3.3 Draw a history of off-diagonal elements \( \alpha^\tau \) ................. 22
      2.3.4 Draw a reduced-rank covariance matrix \( Q_\alpha \) .................. 24
      2.3.5 Draw a history of diagonal elements \( \sigma^\tau \) ................. 24
      2.3.6 Draw a reduced-rank covariance matrix \( Q_\sigma \) .................. 26
   2.4 Number of factors needed in a small macro model . . . 26
      2.4.1 Model description ................................ 26
      2.4.2 Prior ........................................... 27
      2.4.3 Results .......................................... 29
   2.5 Concluding remarks ................................... 32
   Appendix 2.A Bayesian estimation of restricted linear regression model .... 34
   Appendix 2.B Procedure to draw from singular inverse-Wishart distribution .... 37

3 Time-varying vector autoregressions and prior influence .... 43
   3.1 Introduction ........................................ 43
   3.2 Inverse-Wishart distribution .......................... 44
3.3 Model specifications .................................................. 46
  3.3.1 TV-VAR-NO .................................................. 46
  3.3.2 TV-VAR-SV .................................................. 47
  3.3.3 Relationship with Cogley and Sargent (2001, 2005) ............ 48
  3.3.4 Outline comparison exercise .................................. 49
3.4 Prior choices made by Cogley and Sargent .......................... 50
  3.4.1 Prior settings regarding the volatility part of the model ........ 53
3.5 The influence of the prior ........................................... 53
3.6 Concluding remarks .................................................. 57

4 Time variation in the dynamic effects of unanticipated changes in tax policy 65
  4.1 Introduction ...................................................... 65
  4.2 Mertens and Ravn (2013b) replication .......................... 69
    4.2.1 Reduced-form VAR model specification and data description .... 69
    4.2.2 Proxy identification procedure ................................ 70
    4.2.3 Full-sample results ......................................... 74
    4.2.4 Sample-split results ........................................ 75
    4.2.5 Alternative strategy for the sample split ..................... 76
  4.3 Time-varying VAR model specifications ........................... 76
    4.3.1 TV-VAR-NO .................................................. 78
    4.3.2 TV-VAR-SV .................................................. 79
    4.3.3 Prior settings ................................................ 80
  4.4 Results .......................................................... 83
    4.4.1 Time variation in the cyclicality of fiscal policy ............ 83
    4.4.2 Time variation in the dynamic effects of unanticipated changes in tax policy 84
    4.4.3 Robustness checks .......................................... 86
  4.5 Concluding remarks ................................................ 89
Appendix 4.A Derivation of $\beta_{TT}$ ................................ 91
Appendix 4.B Derivation of the first row of $B^{-1}$ ..................... 93

5 Nonlinear and stable perturbation-based approximations 113
  5.1 Introduction ...................................................... 113
  5.2 Models .......................................................... 116
7 Taking Trends Seriously in DSGE Models: An Application to the Dutch Economy

7.1 Introduction ........................................ 220
7.2 Data description .................................... 224
  7.2.1 Some preliminaries ............................... 224
  7.2.2 Features of the data ................................ 226
7.3 Model ............................................. 230
  7.3.1 Outline of the model .............................. 230
  7.3.2 Final good producers .............................. 231
  7.3.3 Intermediate good producers ......................... 232
  7.3.4 Households ................................... 234
  7.3.5 Labor unions and packers .......................... 237
  7.3.6 Foreign block .................................. 238
  7.3.7 Bundling consumption and investment .............. 241
  7.3.8 Government ................................... 242
  7.3.9 Aggregate resource constraints ...................... 243
7.4 De-trending, solving, and log-linearizing the model ..................... 243
7.5 Bayesian estimation ................................ 245
  7.5.1 Calibration and priors ............................. 246
  7.5.2 Results ..................................... 251
  7.5.3 Impulse responses ................................ 254
  7.5.4 Historical decompositions ......................... 259
7.6 Concluding remarks ................................ 263
Appendix 7.A Model ...................................... 264
Appendix 7.B Determining trends ................................ 284
Appendix 7.C De-trending the model equations ............................ 297
Appendix 7.D  Solving for the steady state of the de-trended model ........................................ 310
Appendix 7.E  Log-linearized equations .................................................................................. 312
Appendix 7.F  The Eurozone block ......................................................................................... 320

8  Summary ......................................................................................................................... 323

9  Samenvatting (summary in Dutch) .................................................................................. 327
