# Contents

**Introduction**  
Introduction and outline of this thesis.  
Chapter 1  7

**Chapter 2**  
Latest insights in therapeutic options for systemic right ventricular failure: a comparison with left ventricular failure.  
*Heart. 2009; 95 (12): 960-963.*  
Therapeutic options for systemic right ventricular failure.  
*Heart. 2009; 95 (23): 1951.*  
Chapter 2  15

**Chapter 3**  
Rationale and design of a trial on the effect of angiotensin II receptor blockers on the function of the systemic right ventricle.  
Chapter 3  37

**Physical activity**  
Mechanisms for cardiac output augmentation in patients with a systemic right ventricle.  
*Int J of Cardiol. 2010; 143 (2): 141-146.*  
Chapter 4  55

**Chapter 5**  
Ventricular response to stress predicts outcome in adult patients with a systemic right ventricle.  
Chapter 5  71

**Chapter 6**  
Relation of physical activity, cardiac function, exercise capacity, and quality of life in patients with a systemic right ventricle.  
*Am J Cardiol. 2008; 102 (9): 1258-1262.*  
Chapter 6  91

**Chapter 7**  
Exercise training improves exercise capacity and serum NT-proBNP levels in patients with a systemic right ventricle.  
*Submitted.*  
Chapter 7  105
### Diagnostic tools

**Chapter 8**  
Evaluating the systemic right ventricle by CMR: the importance of consistent and reproducible delineation of the cavity.  

**Chapter 9**  
Cardiac CT provides a reliable alternative for cardiac MRI in patients with a systemic right ventricle.  
*Submitted*

**Chapter 10**  
Echocardiographic determinants of clinical condition in patients with a systemic right ventricle.  

**Chapter 11**  
Tricuspid valve surgery in adults with a dysfunctional systemic right ventricle: repair or replace.  

### General congenital heart disease

**Chapter 12**  
Sexuality in adult patients with congenital heart disease  

**Chapter 13**  
Children and adults with congenital heart disease lost to follow-up: who and when?  
*Circulation.* 2010; 121 (12): e252.

**Chapter 14**
