# Acknowledgments

So this is it! The book we all know as “The Thesis”. Not so much of a distant goal anymore, I think it’s not an understatement to say that this book wraps many sleepless nights, days of malnutrition and a bunch of missed opportunities for socializing. Nevertheless, what you are holding is the result of a truly amazing period, a period that starts from a bit further back than just the beginning of the PhD. Looking back to this journey there is a number of extraordinary, brilliant, spectacular people that, with one way or the other, have kept me going.

First and foremost, I wish to thank my promotor Stan Bentvelsen. Not only because he gave me the opportunity to work for the ATLAS experiment, but also because his enthusiastic approach and constructive discussions have been a constant encouragement and an inspiration throughout these years. A big thank you also to my supervisor Pamela Ferrari, because she accepted to be my supervisor when I needed one and because she showed me how to cope with *the job* when the ‘real’ data were coming.

A special thanks to Sander Klous for being my supervisor in my MSc and for enduring to this role until midway the PhD. He is a true mentor and I have learnt a lot from him, both in physics and ‘real’ life issues. His advices have truly helped. I am also grateful to him for jumping in again and reading this thesis at its last stages, I almost forgot the joy of reading your comments (and there is no irony in this sentence, I sincerely mean it).

A word of gratitude to Christos Eleftheriadis and Anastasios Liolios, as it was their inspiring lectures, back in the day at the Aristotle University of Thessaloniki, that motivated me to take the road of Particle Physics.

Having finished with the PhD, I can now say that sometimes it felt like extreme survival skills were needed in order to keep going. Luckily, there were a few people during this journey that made things a lot more easy. Hegoi Garitaonandia, it was a pleasure working with you. Thank you for being the driving force with your extreme work rate and for having a sense of humor when needed! Ido Mussche, thank you for all the fruitful discussions and for putting up with me barging into your office with every little question I had. Of course nothing would have been so easy (sic) with this thesis if it wasn’t for the guidance of Marcel Vreeswijk and the help of Duc Bao Ta, Daniël Geerts and Hurng-Chun Lee. Jörg Mechnich, thank you for the countless times you helped me with coding, for all the discussions we had inside and outside physics, for the music we played - even though we could’ve played more... I am the one to blame, indeed - for the beers we drank, for sharing an office with me at CERN and later at Nikhef, and of course for withstanding my “blue” mood every now and then... Ma-Manouk Rijpstra, Manuel Kayl, Alex Koutsman, Alexander Doxiadis, Lisa Hartgring, Nicole Ruckstuhl, Gordon Lim, Corey Reed, John Ottersbach, Giuseppe Salamanna, Maria Tselengidou, Akis Gkaitatzis, thanks for all the coffee and lunch breaks and always being around, helping me to keep my sanity with one way or the other. A word of gratitude to Teus van Egdom and Ed van Willigen for dealing with my requests for all the unusual papers I needed from time to time; thank you!

Despite the long working hours there were many moments of bliss outside physics. Christian Mildner, Susanne Waaijers, Alexis Gillett, Chris White thanks for the tons of fun we had and for the good groovy music we created together, I truly hope we get the chance to share the stage once more in the future... Talking about music I, of course, can't forget "DATA?FAIL!", probably the hottest act in the Geneva region! Manu Turlay, with your endless creativity, and punk-face Rob Lambert, thank you for all the songs you wrote and for the invaluable experiences we shared on and off stage. George Kourkafas, a special mention to you as well! Our Mongol trip will happen... and that's all I had to say for now, the rest in Berlin! AC/DC thank you as well.

Georgios Bitios, thanks for all the Saturdays in Amsterdam with the legendary lentils-soup (...and now I know what you are thinking... "From all the things! The lentils-soup?"). Despoina Evangelakou, or should I say Dr. Evangelakou, I can't thank you enough for your support all these years... and it goes as far back as to the days of the MSc. Thank you, thank you, thank you! Andreas Stergiou and Dimitrios Korres, I understand that your awesomeness as flatmates had to be exported, but did it have to happen so early? California awaits ... Miłosz Panfil, thanks for all the good times in the house and I'm sorry I failed so much in learning even the basic Polish words... do widzenia.

Dimitris Palioselitis, or Dr. Dim, or Mister Music, or Chef Magnifique, the past years in the Netherlands have been awesome, thank you for all the music we played, all the cooking we did and all the discussions we had. Your friendship is irreplaceable! *So long, and thanks for all the fish!*

Tasos Zafeiriadis, Giorgos Fontaras, Theodor(e) Prousalis, Kostas Sortikos, Nikias Fontaras, Vasilis Christaras and Eva Kapravelou, thank you for all the times we met in Greece and you made me feel like no time has passed. The madrigalism crew of Christos Vavatsis, Georgios Pierrakos, Marios Kopsidis, Dimitris Panaritis and... Georgios Bitios (once more!) you have been the most reliable and trustworthy bunch of people and I love you for that!

Most of all I want to thank my family, Stamatis, Charoula and Olga. Σας ευχαριστώ που πιστεύετε σε εμένα και που συνεχίζετε να με υποστηρίζετε με κάθε τρόπο!

The very last words go to you Vily, because it is what comes next that motivates me all this time, and if it wasn't for your constant support and encouragement, this little book would still be blank pages. Thank you, καλό μου!

Menelaos Tsiakiris

Amsterdam - July 19, 2012
