Contents

1	Introduction and thesis outline	1
1.1	Price bubbles: Boom and bust cycles	2
1.2	Price volatility and uncertainty	3
1.2.1	Macro: Energy price uncertainty	5
1.2.2	Micro: Firms and farmers	6
1.3	The determinants of price- and volatility dynamics	9
1.3.1	Rational expectations	10
1.3.2	Boundedly rational expectations	12
1.3.3	What do real-life expectations look like?	14
1.4	The benefits of having a good model	17
1.4.1	Building economic models	18
1.4.2	Building econometric models	19
1.5	Overview of chapters	19
2	GO-GARCH: A new multivariate volatility model	23
2.1	Introduction	23
2.2	Generalized Orthogonal GARCH	25
2.2.1	Notation	25
2.2.2	Representation	25
2.2.3	Identification	26
2.2.4	Time-varying correlations	28
2.3	Estimation	29
2.4	Simulation results	31
2.4.1	Orthogonal linkage	31
2.4.2	Non-orthogonal invertible linkage	34
2.5	Empirical example	36

2.6	Concluding remarks	40
3	Method of moments estimation of GO-GARCH models	43
3.1	Introduction	43
3.2	The GO-GARCH model	45
3.2.1	Model and assumptions	45
3.2.2	Reduced factor models	47
3.2.3	Currently available estimation methods	48
3.3	Method of moments estimation	50
3.3.1	The estimator based on a single lag	50
3.3.2	Combining information from different lags	52
3.3.3	Consistency	54
3.4	Monte Carlo simulations	55
3.5	Empirical application to European sector indices	58
3.6	Conclusion	62
4	Volatility: Expectations and realizations	65
4.1	Introduction	65
4.2	Data	69
4.2.1	Underlying value	69
4.2.2	Realized volatility	70
4.2.3	Option prices	70
4.3	Option pricing framework	72
4.3.1	Model for underlying value	72
4.3.2	Pricing of options	74
4.4	Implied variance function	77
4.4.1	Symmetric stochastic volatility	78
4.4.2	Asymmetric stochastic volatility	80
4.5	Estimation	84
4.5.1	Loss-function for parametric estimator	84
4.5.2	Model performance	85
4.6	Empirical results	86
4.7	Concluding remarks	90
4.8	Appendix	92

5 Heterogeneity as a natural source of randomness 97

- 5.1 Introduction 97
- 5.2 Continuous beliefs distributions 101
- 5.3 Continuous beliefs systems 103
- 5.4 Example: Asset pricing with first order linear beliefs 109
 - 5.4.1 Updating according to squared prediction errors 110
 - 5.4.2 Updating according to squared logarithmic prediction errors 111
 - 5.4.3 Local stability 113
- 5.5 Natural sources of randomness 116
 - 5.5.1 Finite number of agents 117
 - 5.5.2 Market impact 118
 - 5.5.3 Interaction and dependence among agents 119
 - 5.5.4 Inherent randomness 122
- 5.6 Concluding remarks 123
- 5.7 Appendix 126

6 Herding, A-synchronous updating and heterogeneity in memory 129

- 6.1 Introduction 129
- 6.2 Continuous beliefs systems 132
- 6.3 A simple benchmark CBS and its extensions 135
 - 6.3.1 Herd behaviour 138
 - 6.3.2 A-synchronous updating 142
 - 6.3.3 Heterogeneity in memory 145
- 6.4 Empirical validation 150
- 6.5 Concluding remarks 152
