You will be contacted as soon as possible.

# Contents

<b>1</b>	<b>Introduction and thesis outline</b>	<b>1</b>
1.1	Price bubbles: Boom and bust cycles . . . . .	2
1.2	Price volatility and uncertainty . . . . .	3
1.2.1	Macro: Energy price uncertainty . . . . .	5
1.2.2	Micro: Firms and farmers . . . . .	6
1.3	The determinants of price- and volatility dynamics . . . . .	9
1.3.1	Rational expectations . . . . .	10
1.3.2	Boundedly rational expectations . . . . .	12
1.3.3	What do real-life expectations look like? . . . . .	14
1.4	The benefits of having a good model . . . . .	17
1.4.1	Building economic models . . . . .	18
1.4.2	Building econometric models . . . . .	19
1.5	Overview of chapters . . . . .	19
<b>2</b>	<b>GO-GARCH: A new multivariate volatility model</b>	<b>23</b>
2.1	Introduction . . . . .	23
2.2	Generalized Orthogonal GARCH . . . . .	25
2.2.1	Notation . . . . .	25
2.2.2	Representation . . . . .	25
2.2.3	Identification . . . . .	26
2.2.4	Time-varying correlations . . . . .	28
2.3	Estimation . . . . .	29
2.4	Simulation results . . . . .	31
2.4.1	Orthogonal linkage . . . . .	31
2.4.2	Non-orthogonal invertible linkage . . . . .	34
2.5	Empirical example . . . . .	36

2.6	Concluding remarks . . . . .	40
<b>3</b>	<b>Method of moments estimation of GO-GARCH models</b>	<b>43</b>
3.1	Introduction . . . . .	43
3.2	The GO-GARCH model . . . . .	45
3.2.1	Model and assumptions . . . . .	45
3.2.2	Reduced factor models . . . . .	47
3.2.3	Currently available estimation methods . . . . .	48
3.3	Method of moments estimation . . . . .	50
3.3.1	The estimator based on a single lag . . . . .	50
3.3.2	Combining information from different lags . . . . .	52
3.3.3	Consistency . . . . .	54
3.4	Monte Carlo simulations . . . . .	55
3.5	Empirical application to European sector indices . . . . .	58
3.6	Conclusion . . . . .	62
<b>4</b>	<b>Volatility: Expectations and realizations</b>	<b>65</b>
4.1	Introduction . . . . .	65
4.2	Data . . . . .	69
4.2.1	Underlying value . . . . .	69
4.2.2	Realized volatility . . . . .	70
4.2.3	Option prices . . . . .	70
4.3	Option pricing framework . . . . .	72
4.3.1	Model for underlying value . . . . .	72
4.3.2	Pricing of options . . . . .	74
4.4	Implied variance function . . . . .	77
4.4.1	Symmetric stochastic volatility . . . . .	78
4.4.2	Asymmetric stochastic volatility . . . . .	80
4.5	Estimation . . . . .	84
4.5.1	Loss-function for parametric estimator . . . . .	84
4.5.2	Model performance . . . . .	85
4.6	Empirical results . . . . .	86
4.7	Concluding remarks . . . . .	90
4.8	Appendix . . . . .	92

**5 Heterogeneity as a natural source of randomness 97**

- 5.1 Introduction . . . . . 97
- 5.2 Continuous beliefs distributions . . . . . 101
- 5.3 Continuous beliefs systems . . . . . 103
- 5.4 Example: Asset pricing with first order linear beliefs . . . . . 109
  - 5.4.1 Updating according to squared prediction errors . . . . . 110
  - 5.4.2 Updating according to squared logarithmic prediction errors . . . . . 111
  - 5.4.3 Local stability . . . . . 113
- 5.5 Natural sources of randomness . . . . . 116
  - 5.5.1 Finite number of agents . . . . . 117
  - 5.5.2 Market impact . . . . . 118
  - 5.5.3 Interaction and dependence among agents . . . . . 119
  - 5.5.4 Inherent randomness . . . . . 122
- 5.6 Concluding remarks . . . . . 123
- 5.7 Appendix . . . . . 126

**6 Herding, A-synchronous updating and heterogeneity in memory 129**

- 6.1 Introduction . . . . . 129
- 6.2 Continuous beliefs systems . . . . . 132
- 6.3 A simple benchmark CBS and its extensions . . . . . 135
  - 6.3.1 Herd behaviour . . . . . 138
  - 6.3.2 A-synchronous updating . . . . . 142
  - 6.3.3 Heterogeneity in memory . . . . . 145
- 6.4 Empirical validation . . . . . 150
- 6.5 Concluding remarks . . . . . 152
