Acknowledgments

First of all, I would like to thank my supervisor Jouko Väänänen: his advice and encouragement during all these years has been nothing short of invaluable. Furthermore, I would also like to thank all the members of the LINT (Logic for Interaction) LogICCC subproject for many stimulating discussions, and the European Science Foundation as a whole for this fascinating and highly successful project.

The Dependence Logic research community as a whole has been extremely welcoming, and an endless source of inspiration and suggestions. In particular, I wish to thank Samson Abramsky, Dietmar Berwanger, Denis Bonnay, Fredrik Engström, Erich Grädel, Lauri Hella, Jarmo and Juha Kontinen, Antti Kuusisto, Allen Mann, Jonni Virtema, and Fan Yang for many, many interesting and fruitful discussions. I also thank Alexandru Baltag, Johan van Benthem, Dietmar Berwanger and Dag Westerståhl for many useful suggestions and comments on my work.

Furthermore, I thank Karin Gigengack, Tanja Kassenaar, Peter van Ormondt and Marco Vervoort for helping me in many practical matters, and Stefanie Kooistra for translating the abstract of this thesis into Dutch.

Moreover, I thank Fausto Barbero, Vincenzo Ciancia, Cédric Dégremont, Sujata Ghosh, Nina Gierasimvzuk, Umberto Grandi, Lauri Keskinen, Lena Kurzen, Ştefan Minică, Daniele Porello, Federico Sangati, Jakub Szymanik, Paolo Turrini, Fernardo Velázquez-Quesada and Joel and Sara Uckelman; and finally, I thank my mother Chiara and my father Pierluigi for sending me many packages of excellent Italian cheeses and sausages, a fundamental source of inspiration and motivation for me during all of my studies.
