If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: https://uba.uva.nl/en/contact, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.
## Contents

1. Introduction  
    1.1 Motivation  
    1.2 Research questions  
    1.3 Outline of the thesis  

2. Relation extraction methods for biomedical text  
    2.1 Introduction  
    2.1.1 Text preprocessing  
    2.1.2 Named entity recognition  
    2.1.3 Parsing  
    2.1.4 Relation extraction  
    2.1.5 Evaluation metrics  
    2.2 Natural Language Processing  
    2.2.1 Sentence splitting  
    2.2.2 Lexical processing  
    2.2.3 Syntactic processing  
    2.3 Machine learning  
    2.3.1 SVM methods for relation extraction  
    2.3.2 Kernel methods  
    2.4 Biomedical corpora  
    2.4.1 GENIA corpus  
    2.4.2 PPI corpora  
    2.4.3 GENIA events corpus  
    2.5 Relation extraction methods  
    2.5.1 Co-occurrence approaches  
    2.5.2 Pattern-based approaches  
    2.5.3 Rule-based approaches  
    2.5.4 Machine learning-based approaches  
    2.5.5 Performance comparison of existing approaches to relation extraction  
    2.6 Conclusion  

3. Extracting causal relations on HIV drug resistance from literature  
    3.1 Introduction  
    3.2 System and methods  
    3.2.1 Text retrieval  
    3.2.2 Text preprocessing  
    3.2.3 Relation extraction  
    3.2.4 Relation combination  
    3.3 Results and Discussion  
    3.3.1 Datasets  
    3.3.2 Relation extraction performance  
    3.3.3 Relation combination performance  
    3.4 Conclusions  

4. A hybrid approach to extract protein-protein interactions  
    4.1 Introduction
