## Contents

1. Introduction 1
   1.1 Motivation 1
   1.2 Research questions 3
   1.3 Outline of the thesis 4

2. Relation extraction methods for biomedical text 5
   2.1 Introduction 5
      2.1.1 Text preprocessing 6
      2.1.2 Named entity recognition 7
      2.1.3 Parsing 8
      2.1.4 Relation extraction 8
      2.1.5 Evaluation metrics 8
   2.2 Natural Language Processing 9
      2.2.1 Sentence splitting 9
      2.2.2 Lexical processing 9
      2.2.3 Syntactic processing 10
   2.3 Machine learning 12
      2.3.1 SVM methods for relation extraction 14
      2.3.2 Kernel methods 15
   2.4 Biomedical corpora 15
      2.4.1 GENIA corpus 15
      2.4.2 PPI corpora 15
      2.4.3 GENIA events corpus 16
   2.5 Relation extraction methods 17
      2.5.1 Co-occurrence approaches 17
      2.5.2 Pattern-based approaches 18
      2.5.3 Rule-based approaches 19
      2.5.4 Machine learning-based approaches 20
      2.5.5 Performance comparison of existing approaches to relation extraction 22
   2.6 Conclusion 23

3. Extracting causal relations on HIV drug resistance from literature 25
   3.1 Introduction 26
   3.2 System and methods 27
      3.2.1 Text retrieval 28
      3.2.2 Text preprocessing 29
      3.2.3 Relation extraction 32
      3.2.4 Relation combination 34
   3.3 Results and Discussion 37
      3.3.1 Datasets 37
      3.3.2 Relation extraction performance 37
      3.3.3 Relation combination performance 39
   3.4 Conclusions 42

4. A hybrid approach to extract protein-protein interactions 43
   4.1 Introduction 44
## Contents

4.2 System and methods
  4.2.1 Text preprocessing
  4.2.2 Extracting candidate PPI pairs

4.3 Results and Discussion
  4.3.1 Data sets
  4.3.2 Evaluation methods
  4.3.3 Performance of PPI extraction algorithm
  4.3.4 Single corpus evaluation
  4.3.5 Cross-corpora evaluation
  4.3.6 Performance time

4.4 Conclusions

5. A robust approach to extract biomedical events from literature
  5.1 Introduction
  5.2 System and methods
    5.2.1 Structured representation
    5.2.2 Learning rules
    5.2.3 Rule combination
    5.2.4 Event extraction
    5.2.5 Text preprocessing
  5.3 Results and discussion
    5.3.1 Datasets
    5.3.2 Evaluation settings
    5.3.3 Event extraction
    5.3.4 Performance time
    5.3.5 Performance analysis
  5.4 Conclusion

6. Discussion and Conclusion
  6.1 The use of syntactic information for different relation extraction tasks
  6.2 The role of machine learning to relation extraction tasks
  6.3 The performance time of relation extraction systems
  6.4 Contribution
  6.5 Future work
