CONTENTS

DANKWOORD ......................................................................................... V

1 INTRODUCTION ............................................................................. 1

2 LANGUAGE IN CHILDREN WITH SLI AND ADHD .................... 5
    2.1 SLI .......................................................................................... 5
        2.1.1 General background ....................................................... 5
        2.1.2 Language characteristics ............................................... 7
    2.2 ADHD ..................................................................................... 16
        2.2.1 General background ....................................................... 16
        2.2.2 Language characteristics ............................................... 19
    2.3 Association between SLI and ADHD .................................. 28
    2.4 Overview of affected language domains in SLI and ADHD 29

3 EXECUTIVE FUNCTIONING AND LANGUAGE ............................ 33
    3.1 Introduction to executive functioning .................................. 34
    3.2 Executive functioning in children with ADHD and SLI ....... 35
        3.2.1 Executive functioning in ADHD ...................................... 36
        3.2.2 Executive functioning in SLI .......................................... 38
    3.3 Executive functioning in relation to language .................... 45
    3.4 Overview research questions and general expectations ..... 46

4 RESEARCH METHOD ...................................................................... 49
    4.1 Subject selection ................................................................. 49
        4.1.1 Typically developing group ............................................ 50
        4.1.2 SLI group ..................................................................... 51
4.1.3 ADHD group ............................................................ 53
4.1.4 Overview of subjects............................................. 55
4.2 Procedure .................................................................... 58
4.3 Language assessment.................................................. 59
  4.3.1 Narrative task......................................................... 61
  4.3.2 Repetition tasks..................................................... 69
  4.3.3 Language questionnaire ....................................... 71
4.4 Neuropsychological assessment ................................. 72
4.5 Statistics ..................................................................... 79
  4.5.1 (Missing) data ....................................................... 80
  4.5.2 Statistical analyses .............................................. 81
  4.5.3 Interrater reliability .............................................. 82
5 Results of language measures ........................................ 85
  5.1 Narrative task .......................................................... 87
    5.1.1 General outcome measures of the narrative .......... 87
    5.1.2 Grammatical outcome measures of the narrative .... 90
    5.1.3 Pragmatic outcome measures of the narrative ...... 91
    5.1.4 Interim summary on narrative task measures ......... 95
  5.2 Sentence imitation task ............................................ 96
  5.3 Non-word repetition task ......................................... 97
  5.4 Language questionnaire ............................................ 98
  5.5 Comparisons of the language measures .................... 102
    5.5.1 Within-group comparisons ................................ 104
    5.5.2 Individual comparisons ..................................... 104
  5.6 Correlations between the language measures ............. 107
  5.7 ADHD sub-groups .................................................. 108
    5.7.1 ADHD sub-groups with/without language problems 108
    5.7.2 ADHD sub-groups with/without reading problems . 119
  5.8 Summary of language measures ................................. 122
6 Results of executive functioning measures .................... 125
  6.1 Results of the executive functions ............................ 125
6.1.1 Inhibition ................................................................. 127
6.1.2 Working memory ..................................................... 128
6.1.3 Planning ................................................................. 130
6.1.4 Cognitive flexibility ............................................... 132
6.1.5 Non-verbal fluency ................................................. 133
6.1.6 Results of the executive functions–interim summary. 135
6.2 Comparisons of the executive functions ......................... 135
  6.2.1 Within-group comparisons ...................................... 136
  6.2.2 Individual comparisons .......................................... 137
6.3 Correlations between the executive functions .................... 140
6.4 Summary of executive functioning results ....................... 141

7 Comparing language and executive functioning results .................. 143
  7.1 Correlations between language and executive functions . 144
    7.1.1 Pragmatics in relation to executive functioning ...... 144
    7.1.2 Grammar in relation to executive functioning ........ 145
  7.2 Executive functioning in ADHD sub-groups .................. 146
    7.2.1 ADHD children with language problems ............... 147
    7.2.2 ADHD children with reading problems ................. 148
  7.3 Comparisons of the language and executive functions .... 148
    7.3.1 Within-group comparisons .................................. 149
    7.3.2 Individual comparisons ..................................... 149
    7.3.3 Grammar and pragmatics in relation to executive functioning ...................................................... 152
  7.4 Summary of relation between language and executive functioning ......................................................... 154

8 Discussion and conclusions ............................................. 157
  8.1 Language ........................................................................ 157
  8.2 Executive functioning ................................................ 159
  8.3 Language and executive functioning ............................ 161
  8.4 Implications and further research ................................. 162
References ................................................................................................. 165
Summary .................................................................................................. 187
Samenvatting ........................................................................................ 195
Curriculum vitae ...................................................................................... 203
