You will be contacted as soon as possible.
Contents

1 Introduction

2 The Impact of the Menstrual Cycle and Hormonal Contraceptives on Competitiveness
   2.1 Introduction
   2.2 Measurement of menstrual cycle phases and hormonal contraceptives
   2.3 Experimental design
   2.4 Data
   2.5 Results
   2.6 Possible pathways
      2.6.1 Risk aversion
      2.6.2 Mathematical ability
      2.6.3 Overconfidence
   2.7 Conclusions

3 Digit Ratios, the Menstrual Cycle and Social Preferences
   3.1 Introduction
   3.2 Biological markers
      3.2.1 2D:4D
      3.2.2 The menstrual cycle
      3.2.3 Hormonal contraceptives
   3.3 Data
   3.4 Experimental design

      3.2.2 The menstrual cycle
      3.2.3 Hormonal contraceptives
   3.3 Data
   3.4 Experimental design
3.5 Results ................................................................. 32
  3.5.1 2D:4D ................................................................. 32
  3.5.2 Menstrual cycle .................................................... 35
3.6 Discussion ............................................................. 37
3.7 Conclusions ............................................................ 41

4 Handedness Predicts Social Preferences: Evidence Connecting the Lab to the Field 43
  4.1 Introduction ............................................................ 43
  4.2 Experimental design and data ......................................... 46
  4.3 Laboratory results ...................................................... 48
  4.4 Survey data .............................................................. 53
  4.5 Survey results ........................................................... 54
    4.5.1 Trust and reciprocity .............................................. 54
    4.5.2 Altruistic behaviour .............................................. 55
  4.6 Possible biological mechanisms ....................................... 60
  4.7 Conclusions ............................................................ 61

5 Gender, Competition and Career Choices 63
  5.1 Introduction ............................................................ 63
  5.2 Academic study profiles in the Netherlands ......................... 66
  5.3 Experimental subjects and design ..................................... 69
    5.3.1 The environment .................................................. 69
    5.3.2 The experimental design ......................................... 70
  5.4 Results ................................................................. 72
    5.4.1 Profile choices and school data .................................. 72
    5.4.2 Gender differences in competitiveness and other psychological attributes 77
    5.4.3 Can competitiveness account for gender differences in study profile choices? 80
    5.4.4 Decomposing the effect of competitiveness .......................... 85
  5.5 Conclusions ............................................................ 86
  5.6 Appendix ............................................................... 90
