It was quite an experience! I cannot say I am sad that it is almost over but I will surely miss all the awesome people I met in the past (almost) 5 years and I cannot thank enough to all for contributing to my life in many precious ways.

Peter, firstly thanks for convincing me to be a part of the Amsterdam project. I don't think I could have been in a better group. You thought me a lot and showed endless patience with my impatience. You always showed that there are two sides to the coin when I can only see one. Thanks for making me part of the team! Eric S., you have been more than a supervisor to me. I am very happy to meet you and I feel like you are my brother I always wanted to have. Thanks for being who you are in every single way and thanks for taking care of me. I hope that I will meet people like you during the rest of my academic carrier. And of course I hope I will have the chance to work with you soon enough. Eric V., although we did not spend a lot of time together, I was always able to connect with you as if we were talking in a daily basis. Thanks for supporting me when I needed help the most. Thanks for sharing my enthusiasm and shaping it in an efficient way. I admire your passion for flooded plants!

I would also like to thank the committee members for agreeing to be a part of the committee and all the coauthors of this thesis. I was so lucky to be able to collaborate with many people in different labs, thanks for opening your doors to me! Rens, you were always extremely

enthusiastic with my work and I am glad to be a part of your team. Thanks for your valuable comments on the chapters of this thesis. I wish I could have worked as a postdoc in your group but at least I am hoping that we can still collaborate on excellent projects! Rashmi, you are one of those people who always have a positive attitude towards everything. It was great to work with you and write a proposal together. Thanks a lot! Hans, you are one of the most talented PhDs I have ever met. I think we were a great team together! I enjoyed your company in endless weekends and thanks for all your help and great ideas! I wish we started working together earlier. Divya, you are a perfect combination of hard work and intelligence in such a tiny body! I cannot even imagine how many pots you prepared and how many seedlings you transplanted. And even more, you also helped me with the jobs you probably are sick off! Thanks for always being so giving and positive! Alex, we worked on this project for just more than a year but your contribution shaped the ideas and the work in this thesis substantially, your supervision was invaluable. Thank you! Heidi, Leisje, Hans and Ronald, thanks for the insightful discussions! Julia, thanks for your valuable contribution in this thesis!
