The completion of my PhD work owes to the help and support of many people - past and present members of the (former) Polymer-Analysis (now Analytical-Chemistry) Group and not. A few of them contributed directly to the Thesis’s projects. The majority of them contributed to its final success “indirectly” in virtue of the fact that they made my staying in A’dam more pleasant. All these people deserve my heartfelt gratitude. In this section, I will try the not trivial enterprise of mentioning (all of) them. Yet, this is the very last piece of my work, I am a bit in a hurry, and the chance is high that I will forget somebody. I apologize in advance for that.

I would first like to thank Peter for accepting me in his group and for helping me a fair deal in finding a stimulating PhD opportunity in A’dam. Thank you for the good time (and the bad jokes) we had at Kraak’s corner sipping beer and eating chips. Thank you also for your blunt and useful comments about my work and for improving Chapter 2. Last but not least, good luck in the organizing of HPLC 2013. I am sure it will turn a great success. Really hope I’ll have the chance to attend it.

My most sincere thanks go to Hans-Gerd, my PhD Thesis supervisor.

Dear Hans-Gerd,

The completion of this PhD Thesis has been a long and difficult journey. Yet, as I finally see its end approaching, I feel that this effort has resulted in the acquiring of important tools, which, I am confident, will turn useful in the progress of my career. In all of that, your supervision played a fundamental role. Thanks to it, I am definitely more at ease when it comes to managing research projects.

From the start of my PhD, you firmly believed that it could turn out successful. Partly because of this, and partly - I guess - because of the good relationship we had been establishing, you were very present and helpful when things turned grim. Your positive attitude during that time contributed to the retrieving of the lost confidence, finally leading my PhD to a “second” start. This attitude of yours deserves a sincere “Thank you!”.
Acknowledgements

My co-promoter, Wim, also deserves special thanks.

Dear Wim,

Your strong background in chromatography and your ease in dealing with abstract matters helped me out whenever the subject got “tough”. Thank you for that.

I am deeply indebted to many other colleagues from the Polymer-Analysis Group: Mauro, for helping me getting “a network” when first coming to A’dam and for the good time spent together (not that “much” in Krugerplein, though!); Gabriel, for his help with Matlab and for fruitful discussions when writing Chapter 2 (but also for the pleasant time and the good food I had with you and Montse); Erwin, for being such a nice office mate, for his help with instrumentation and for writing the Samenvatting of this Thesis; Linda, for being so kind and friendly and for the great time I had with her, Ruud and the “kids”; Sonja, for the “cool” birthday’s parties we threw together; Sjoerd, for his enthusiasm about Science and for the insightful comments about my manuscript; Petra, for her dynamism (“Het gaat niets boven Groningen”); Peter P, for being a nice and fair colleague and for the many noon-time walks down to Carlos’s; Wim D, for his help in solving software-related problems; José Manuel, for the good time in Venserpolder (but also in Barcelona and, more recently, in Budapest); Yu Li, for her kindness and for introducing me to “proper” Chinese food; Peter V, for always being keen on a good laugh; Tom, for his generosity; Inger Lill and Morten for being such good company when first getting to A’dam; Dini, for her help in dealing with “Dutch matters”; Eva and Julia, for the great work they did in improving Chapter 5; Rob, for useful tips in troubleshooting LC pumps and for good time in A’dam and in Groningen; Monique, for her help and support at the beginning of my PhD. I am quickly running out of words. Yet, it would feel not right to forget mentioning Stella, Aleksandra and Piotr, Elena (thank you for your recent help) and Dominique, Rashid, Abdul, Fran, Shane, Bas (thank you for introducing me to the Poppe plots), Maya, “my” student Antonio, Hanneke, Wijbren, Simona, Fiona, Ruo Hua (it was good to meet you in Beijing and Dalian), Patrick, Marika, Mayte, Sandra, Arend, Wil, Jirka, Lenka, Marcus, Xu Lin. Finally, last-minute but really heartfelt thanks go to Daniela.
Many are also the people outside the Polymer-Analysis Group whom I would like to thank: Francesco and Benedetta (my deep gratitude to you guys is not just for the great time I had with you in A’dam but also for being “brave enough” to visit me in China), Franco and Puk (between other things, I enjoyed our get-together in a breezy summer night in Alghero and the visit in Aachen), Elisa (thank you for all your help work-related and not and for the nice time I had with you) and Guido (thank you so much for your invaluable help last December), Alessandro (thank you for the Italian-style coffee breaks, for your positive attitude and for introducing me to the “Mac” world) and Karianne, Sara (in bocca al lupo per la Tesi!), Sophia, Jarek (let’s keep on fighting, mate!) and Curro (thank you for delicious tortilla), Kumi and Tijl, Janina and Philipp, Gosja, Pat (it was nice to meet you in Beijing), the Homkat’s crew (Fabrizio, Gledison, Tehila, Jurjen, Sander, Ivo, Wojciech, Erica, Rosalba, Pierre, Massimo, Vladi, Fred), Teresa, Cristina, Charles, Maikel (thank you so much for all your help with Matlab), Olja and Hans, Jeroen, Fernando, Aimee, Li Jie, Murat, Anna, Griselle, the Italians (Simona (I still remember our chance encounter in Palermo in a sunny August noon-time), Olga (good luck with Zora!), Mariangela, Raffa (thank you for being such a great host), Tora, Enrico, Fabrizio R, Tommaso and Stefania, Stefano, Gabriella, Lara, Alessia), Verena (good luck in Montpellier), Ana, Pablo, Laura, Alex, Yves, Victor, Leszek. My final heartfelt thanks go to Mw. Rosette Van Raalte.

Un ringraziamento sentito va al Professor Dondi (Università di Ferrara) per avermi permesso di svolgere una parte del lavoro nel suo laboratorio.

Infine, un ringraziamento “davvero” speciale va alla mia Famiglia per il suo aiuto nei momenti più difficili e per il costante supporto ed incoraggiamento. Questa Tesi di Dottorato è dedicata a voi. Grazie di cuore!

五月三十一号我欧盟的项目就要结束了。到了那天我就会离开大连。在大连的这段时间，我生活得非常愉快，同时也积累了很多经验。到现在最重要的成果是我写完了我的博士论文。在之前的部分，我已经感谢了许多给予我很大帮助的人。现在我还想特别感谢一下我在中国大连的生活中对于我来说非常重要的两个人。

尊敬的张玉奎教授、张丽华教授：

你们好！

我非常感谢你们，因为你们不但给了我实验室和你们一起工作的机会，而且在生活上和工作上也给了我许多热情的帮助。

在写这段话的时候，我心里有两种感受：一是我很高兴，因为下个月我就能博士毕业了。由于攻读博士学位的时间比学校规定的时间多了三年，所以我现在的感觉是一个既漫长又艰难的旅游终于要结束了。二是我也感觉非常抱歉，因为在那儿工作一年多的时间里，我没有把我最主要的精力放在实验上，而是花了大量的时间忙于我的博士论文，还望得到你们的谅解！

此致

敬礼

老费
