The work in this thesis was performed at IVAM UvA BV – Research and Consultancy on Sustainability, Plantage Muidergracht 24, 1018TV Amsterdam.

The study was facilitated by a general grant from the UvA Holding BV. Parts of the study elaborate on other projects such as the capacity building project NanoCap that was granted by the European FP6, Science and Society Program, grant no. SAS-CT-2006-036754-NanoCap, the study within the context of the European Social Dialogue in the Construction Industry as granted by the European Commission, Directorate General Employment by the grant agreement no. VS/2008/0500-Si2.512656, a study granted by Stichting Arbouw to perform exposure measurements in the construction industry, the pilot projects ‘Nano Reference Values’ and ‘Guidance for safe working with nanomaterials’, as commissioned by the Dutch social partners FNV, CNV and VNO/NCW with a grant from the Dutch Ministry of Social Affairs and by many discussions within the frame of the Working Conditions Committee of the Dutch Social Economic Council.
