## Contents

Acknowledgments ix

1 Introduction 1
   1.1 Motivation ...................................... 1
   1.2 Overview of the dissertation .................... 4

2 Preliminaries 9
   2.1 Dynamic Epistemic Logic .......................... 9

3 Message Passing in Dynamic Epistemic Logic 17
   3.1 Introduction ..................................... 17
   3.2 The Language of Knowledge and Messages ............ 18
   3.3 Modeling Message Passing .......................... 22
   3.4 Models with Realistic Properties .................. 29
   3.5 Axiomatization ................................... 34
   3.6 Related Work ..................................... 37
   3.7 Conclusion ....................................... 38

4 Logic of Information Flow on Communication Channels 39
   4.1 Introduction ...................................... 39
   4.2 An Adaptable Logic for Communication, Knowledge and Protocols .............. 41
      4.2.1 Language ..................................... 41
      4.2.2 Semantics ................................... 43
   4.3 Comparison with IS and DEL ....................... 49
   4.4 Applications ..................................... 50
      4.4.1 Common Knowledge ............................ 50
   4.5 Conclusion ....................................... 56
# 5 Common Knowledge in Email Communication

5.1 Introduction .................................................. 57
   5.1.1 Contributions and Plan of this Chapter ............... 59
   5.1.2 Related Work ........................................... 60
5.2 Preliminaries ............................................... 61
   5.2.1 Messages .............................................. 61
   5.2.2 Emails ............................................... 62
   5.2.3 Legal States .......................................... 63
5.3 Epistemic Language and its Semantics .................... 65
5.4 Epistemic Contents of Emails .............................. 69
5.5 Common Knowledge .......................................... 72
5.6 Proof of the Main Theorem .................................. 74
5.7 Analysis of BCC ............................................ 78
5.8 Distributed Systems Perspective ......................... 82
5.9 Conclusion .................................................. 84

# 6 Possible and Definitive Knowledge in Email Communication

6.1 Introduction .................................................. 87
   6.1.1 Overview .............................................. 88
6.2 The Logic of Messages ....................................... 88
6.3 Model Checking .............................................. 93
6.4 Blind Carbon Copy .......................................... 96
6.5 Model Checking with BCC .................................... 101
6.6 Conclusion .................................................. 105
6.7 Proof of Theorem 6.3.5 ..................................... 107

# 7 Action Emulation

7.1 Introduction .................................................. 113
7.2 Definitions ................................................... 114
7.3 Bisimilar Action Models ..................................... 115
7.4 Propositional Action Emulation ......................... 127
7.5 Conclusion .................................................. 131

# 8 Knowledge, Belief and Preference

8.1 Introduction .................................................. 133
8.2 Belief Revision Without Constraints ....................... 134
8.3 Belief Revision with Linked Preference Relations ........ 138
8.4 Belief Update and Belief Change .......................... 142
8.5 Analyzing Plenary Dutch Meetings ....................... 147
8.6 Conclusion .................................................. 149
